## CITY DOCUMENT No. 18

Inaugural Address of the Mayor
City Government of 1907

TOGETHER WITH THE

# ANNUAL REPORTS

OF THE OFFICERS OF THE

# City of Quincy

Massachusetts

FOR THE YEAR 1906

BOSTON
FARRINGTON PRINTING Co.
1907

2 10 3 26 July 31/07

## City Government 1907

#### MAYOR

## JAMES THOMPSON

## Department Officials

Commissioner of Public Works, THOMAS F. BURKE.

City Treasurer, HENRY G. FAY

City Clerk, HARRISON A. KEITH

Collector of Taxes,
JAMES H. CUNNINGHAM

City Solicitor.
WILLIAM R. THOMAS

Chief of Police, FRANK E. BURRELL

Chief Engineer of Fire Department, AMOS L. LITCHFIELD

Overseer of the Poor, FREDERICK F. GREEN

City Engineer,
HAMILTON FLOOD

City Physician, HENRY C. HALLOWEL'S

Inspector of Milk, WILLIAM G. CURTIS

Inspector of Animals, FRANCIS ABELE, JR.

## Administrative Boards

#### Assessors

Meet every Monday and Thursday at 9 A. M.

CHARLES H. JOHNSON, Chairman, WILLIAM B. GLOVER, J. WINTHROP PRATT, Term expires first Monday of February 1909
"" "" "" "" "" 1908
"" "" "" "" "" 1910

#### Park Commissioners

GEORGE E. PFAFFMANN, Chairman.

FRED B. RICE, Secretary.

DEXTER E. WADSWORTH

#### Board of Health

WILLIAM H. TEASDALE, Chairman.

ROSS K. WHITON, M. D., Clerk.

HENRY P. KITTREDGE

Sanitary Inspector, Edward J. Lennon.
Inspector of Plumbing, Jeremiah J. Kenilev.
Inspector of Meats and Provisions, James F. Allen.

## Trustees of Thomas Crane Public Library

Meet first Wednesday of month at 7.30 P. M.
V. C. BUTLER, Chairman, HARRISON

HARRISON A. KEITH, Secretary

ELLERY C. BUTLER, Chairman. GEORGE W. MORTON, Treasurer. HENRY McGRATH,

HARRY L. RICE CHARLES R. SAFFORD

## Managers of Adams Academy

WILLIAM EVERETT LUTHER S. ANDERSON GEORGE M. SHEAHAN FREDERIC J. PEIRCE

PERRY LAWTON

## Managers of Woodward Fund and Property

JAMES THOMPSON, Mayor
HENRY G. FAY, City Treasurer
HARRISON A. KEITH, City Clerk
HENRY O. FAIRBANKS.

HENRY O. FAIRBANKS, City Auditor
GEORGE A. SIDELINGER, elected by the Council

## Managers of Public Burial Places

Meet second Tuesday of each month at 7.30 P. M.

ALBERT W. FAY, Chairman JOHN Q. CUDWORTH WELLINGTON W. MITCHELL, Clerk ALFRED O. DIACK JOSEPH H. VOGEL BENJAMIN KING

JAMES NICOL, Superintendent

#### Registrars of Voters

EDWARD J. McKEON, MICHAEL B. GEARY, GEORGE PROUT, Term expires May 1, 1910 Term expires May 1, 1909 Term expires May 1, 1908

HARRISON A. KEITH, City Clerk

## Assistant Engineers of Fire Department

FRANK C. PACKARD

GEORGE O'BRIEN

DAN1EL J. NYHAN

### Inspector of Buildings

WARREN S. PARKER

## City Council

WALTER E. PIPER, President

70 Centre Street

#### Councilmen-at-Large

ARTHUR C. BEAL, Vane St., Atlantic. WALTER E. PIPER, 70 Centre St. J. LEONARD FERGUSON, 45 Will'd St., W.Q. EUGENE R. STONE, 52 River St., Q.P. WALTER S. PINKHAM, 111 Warren Ave., W.

#### Councilmen from Wards

Ward One

JESSE F. CURTIS, 49 Upland Rd. OTTO GELOTTE, 255 Whitwell St. CARLE R. HAYWARD, 233 Goffe St.

Ward Two

WILLIAM T. DONOVAN, Chubbuck St. JOSEPH McKINNON, 50 Broadway MICHAEL T. WALSH, 158 Quincy Ave.

Ward Three

Ward Four

JEREMIAH CURTIN, JR., 7 Grove St. CHARLES J. McGILVRAY, 118 Willard St. ROBERT J. TEASDALE, 48 Willard St.

Ward Five

VERNON S. BROKAW, 225 S. Central Ave. WENDELL H. HULL. 30 Park St. HERBERT J. POLK, 165 Beach St.

Ward Six

WILLIAM H. DEACON, 194 Liberty St. REDNOR P. COOMBS, 180 Billings St. ALEXANDER FALCONER, 46 Indep'd'ce Ave. RALPH W. HOBBS, 11 Clark St. GEORGE HUNTER, 80 Independence Ave. GEORGE F. SAWYER, Jr., 31 Faxon Rd.

### Chosen by the Council

HENRY O. FAIRBANKS, 77 Beach Street,

City Auditor Residence Telephone: Quincy, 217-6.

GEORGE T. MAGEE, 2 Carruth Street,

Clerk of Council and Committees

Residence Telephone: Quincy 75-2. HARRY W. TIRRELL, Manet Avenue, H. N.

City Messenger Manager of Woodward Fund and Property

WENDELL H. HULL,

GEORGE A. SIDELINGER,

Trustee of City Hospital

RALPH W. HOBBS.

## Standing Committees

Finance, Accounts, Claims, Contracts and Salaries-POLK, SAWYER, STONE, PINK-HAM, DEACON. McGILVRAY, GELOTTE.

Streets, Ways Sidewalks, Bridges and Lights - HOBBS, DEACON, FERGUSON, DONOVAN, HULL, TEASDALE, HAYWARD.

Fire Department and Police - STONE, BEAL, McGILVRAY, CURTIS, Mc-KINNON.

Sewers, Drains and Water Supply - DONOVAN, HUNTER, BEAL, HAYWARD, BROKAW, COOMBS, CURTIS.

Public Buildings and Grounds-SAWYER, GELOTTE, FALCONER, WALSH,

Ordinances, Licenses, Printing, Rules and Orders-FERGUSON, HULL, FALCONER. Legislative Matters, Elections and Returns - CURTIS, HOBBS, WALSH. Health, Poor, State and Military Aid-HUNTER, TEASDALE, COOMBS.

## City Council

Regular Meetings held on the First and Third Mondays of each month at 7.35 P. M.

#### **Committee Meetings**

Finance, Accounts. etc.,
Ordinances, Licenses, etc.,
Fire Department and Police,
Sewers, Drains, Water Supply,
Streets, Ways, etc.,

Monday evenings Tuesday evenings Wednesday evenings Thursday evenings Friday evenings

Meetings of the Committees on Health, Poor, State and Military Aid, Legislative Matters, Elections and Returns, Public Buildings and Grounds, Special and Joint Committees will be held at the call of the Chairman, or at such times as may be designated by the Council.

## MAYOR'S ADDRESS

QUINCY, MASS.

January 7, 1907

JAMES THOMPSON

## Mayor's Inaugural Address.

#### Gentlemen of the Council:

Having taken the oath of office as required under the city charter, to promote and to protect to the best of our ability the interests of our city, imposes a moral obligation as well as that patriotic duty of all good citizens in whom has been reposed the confidence of the community, of giving our best thought and effort to advance that which is best not only for a section but for the whole community after a comprehensive examination of the merits of the many questions which will be submitted to us.

I herewith submit a financial statement of the condition of the city at the close of business on December 31, 1906, covering all debts paid as well as contracted, with a summary of same and a comparison with the previous year:

### DEBT STATEMENT.

Municipal Debt Jan. 1, 1906	\$486,630.00
Paid during the year	79,670.00
Leaving	\$406,960.00
Added during the year	133,490.00
Debt Dec. 31, 1906	\$540,450.00

Water Debt Jan. 1, 1906	\$694,000.00
Leaving Added during the year	\$654,500.00
Added during the year	
Debt Dec. 31, 1906	\$684,500.00
Sewer Debt Jan. 1, 1906	\$523,700.00
Paid during the year	17,300.00
Leaving	\$506,400.00
Added during the year	20,000.00
Debt Dec. 31, 1906	\$526,400.00
Park Debt Jan. 1, 1906	\$36,000.00
Paid during the year	2,000.00
Debt Dec. 31, 1906	\$34,000.00
Total Debt Jan. 1, 1906	
Paid during the year	138,470.00
Leaving	
Added during the year	183,490.00
Total Debt	\$1,785,350.00
DIVIDED AS FOLLOWS:

Survey plans	1,000.00
	\$133,490.00

The years 1905 and 1906 have been strenuous in demands, and fulfilment of matters long postponed, especially in that of appropriations for school purposes. And what is unsatisfying in it all is that the larger proportion of the accommodations provided is to meet existing wants of long standing by substituting new buildings for old quarters also without that future provision for school growth apparently warranted by the expenditure; nor is the pressure in this direction yet relieved as seen by the necessities in the Coddington school district.

Out of a total debt incurred in the past two years within the municipal debt limit of \$290,490.00, the sum of \$202,-250.00 has been appropriated for school purposes alone.

At this meeting an order will be presented calling for the appropriation of \$42,055.95, with interest from October 8, 1906, our proportion of the expense and cost of the Fore River Bridge as assessed by a special commission appointed by the Superior Court to apportion the same upon the several municipal and quasi-public corporations benefited. Also the sum of about \$15,000, our part of the cost of the Hancock Street Bridge, we may expect to be called upon to pay at any time, and provision must be made for it within the debt limit. The statute, however, has placed its limitations upon the municipal debt we may incur, and, necessarily, our wants must be governed by it.

We begin the year with a margin on the same of \$83,-858.06. Therefore, I cannot see how, for the present, any appropriation involving a debt other than stated can be made; for it seems to me that a city, no less than an individual, cannot go to the extreme limit of its credit without creating doubts in the minds of persons or corporations to whom we apply for loans. And as all applications must be accompanied with a statement of our financial condition, we

cannot afford to raise questions in regard to the management of our monetary affairs.

I have dealt with the matter of the city as a borrower upon its credit as established by law.

We now turn to the matter of current expense which is to be met in the tax levy. Again the statute imposes the limit to which the tax may go, namely, twelve dollars per one thousand dollars valuation, based on two ways: First, the average of the three preceding years' valuation, less all abatements; second, on the valuation of the preceding year, less all abatements.

During the life of our city both methods have been used as the valuation on which the amount has been raised; and as by neither method can we raise a sufficient sum to pay the charges imposed by ordinances, and otherwise deemed necessary to meet the expenses, receipts of the city from various sources have been taken to make up the sum lacking.

Greater scrutiny must be used this year in the disposition of the receipts, and that less can be used for current expenses than in the past, is quite clear to me if we are not to impose a heavy burden upon the property of the city by an extreme tax rate. The chief reason for this will be the fact that the main sewer charges (the city's proportion of the cost of the system) are now to be raised to pay the expenses against the same; this being the first time such has occurred, with the exception of a small amount included last year in the tax levy, as the proportion levied against private property has been expended with the exception of new assessments on extensions during the past year.

## METROPOLITAN DISTRICT AFFAIRS.

The Metropolitan Park Commission informs me that the grading and surfacing of Furnace Brook Parkway from Adams Street to Blue Hills Reservation has been substantially completed, and it was expected to be opened for public use by January first.

Wampatuck Road in Blue Hills Reservation, connecting the end of Furnace Brook Parkway with Administration Road, which runs through the Reservation from east to west, has also been completed. Sassamon Road has been finished for use as a driving road from Administration Road down to the entrance of Sawcut Notch Road at the Pine Tree Brook entrance in Milton. It is therefore possible to make a pleasant circuit drive in Blue Hills Reservation, entering by Furnace Brook Parkway and driving over in succession Wampatuck Road, Administration Road, Sassamon Road and Sawcut Road, back to the Parkway.

At Quincy Shore the building of the road to subgrade from the National Sailors' Home to Squantum Street has been completed, and at the same time the beach along the waterside has been regraded. This work has involved the building of a concrete bridge across Sachem Brook and a concrete culvert across the mouth of the creek near the Sailors' Home. Next year it is expected to complete the work already begun on Quincy Shore, and possibly to begin work on the future connection between the Shore and the Parkway.

The Metropolitan water charges for the year 1906 reached the very large sum of \$46,314.16, an increase over the previous year of 30 per cent.; accounted for by the method of assessment, as provided under chapter 426, Acts 1904, two-thirds of which is based on consumption, becoming effective for the first time.

As I stated in my inaugural of last year, our per capita consumption of November of one year ago was the second highest of any city or town in the Metropolitan district, and in the opinion of the engineer of the distributive department of the system, was an excessively large consumption in com-

parison with others in the district of about our population and character. Our per capita consumption in November, 1905, was 113 gallons, while in November, 1906, it was reduced to 97 gallons. It is fair to assume that our population has not remained stationary during the past year, for we have added 209 new water services, nearly all of which were connected prior to November, and therefore additional consumers during that month, showing a larger per capita reduction in comparison than the above named figure indicates.

I find by reference to meter readings covering the periods above named that the large water takers increased their consumption 17 per cent.; therefore the cause for decrease is to be sought elsewhere. It is true that during the year about the average number of leakages have been found in our pipes, but taking the consumption of the two periods named, we have every reason to believe the placing of meters has had a most salutary effect, and must be credited with the showing made. It is only in this direction that I see any opportunity to effect a saving in the Metropolitan charges levied upon us for water, sewerage and park purposes, which during the past year reached a total of \$82,486.48, and represented a charge in the tax rate of \$2.77.

There will be but a slight reduction in the South Metropolitan sewer charge, and a considerable increase on account of construction of Furnace Brook and Quincy Shore Parkways, which will be partially offset by the extra paid in last year's assessment which should have been paid in 1905 had the Commission appointed to apportion percentage reported in time.

The percentage of our assessments on these several matters is now fixed for the present five-year period; but with expenditures within our limits for these purposes, we cannot hope to escape our proportionate part of them.

#### WATER DEPARTMENT.

The money appropriated to extend the water mains has been expended mainly in response to petitions for the same.

The authority under which we may borrow money for the purposes of the water plant—mainly if not wholly devoted to the extension of the water mains is about exhausted. The extension of the water mains has tended not only to the upbuilding of the city, its growth and the general health of the public, but has added to its receipts as well; and it is from this source alone that we may hope to make it self-paying. I am pleased to say that the estimated income for the past year has been exceeded, and if such increase in receipts as made during 1906 is continued, with the saving in Metropolitan water charges, we may soon hope to equal the expenses of the department.

I will therefore ask the Council to grant the necessary authority to petition the legislature to borrow a further sum of money for the extension of water mains, fixtures and additions; and if that authority is obtained, I would recommend that we make the annual appropriation for extensions. Several petitions for extensions are now on file and should be attended to in the spring as early as possible.

The sum appropriated for the purchase and installation of meters has been almost wholly expended in the purchase of the Empire meter, manufactured by the National Meter Company. Upon investigation I found great difference of opinion as to the merits of the different makes upon the market, and only after considerable correspondence and interviews with persons connected with public and private water supplies was the purchase made. The consensus of opinion was that the Empire meter had proven to be the most economical, durable and accurate; so simple in recording that the average man may gauge his own consumption, and read it easily. I have not the least doubt that the reduc-

tion in the per capita consumption must be ascribed to the installation of meters. We placed them where we suspected a large waste occurred without benefit to the individual or the company; it being simply a careless waste with no compensating return to the city. I feel that the reading of the meters by the inspector and the water taker as well, is teaching a lesson in economy which it is plain to see must be advantageous to all, and for which ample opportunity still exists, our consumption in November, 1906, being largely in excess of other cities that are metered.

I recommend that a sufficient sum be appropriated for the further installation of meters.

#### SEWER DEPARTMENT.

The money appropriated for this department has been mainly expended to complete that section for the disposition of the sewage at the Fore River Shipbuilding Company's plant and vicinity. This has been a very expensive piece of work, and justifiable only because of the large interests involved.

At the time of the largest construction of the system of sewerage in the city, this and other sections of similar character were omitted because of the known difficulties and expense attached thereto. In my opinion, when the city is compelled to take up these other sections to which I have referred, the work should be let by contract to the lowest responsible bidder, as the city is not equipped to perform it economically.

Other streets in localities where conditions were deemed detrimental to the public health and ordered abated by the Board of Health, have been sewered, and petitions for other minor extensions have been granted.

The Metropolitan Park Commission requests if any sewer is to be constructed in the Quincy Shore Parkway it

be done preceding completion of the roadway. I would suggest that this matter be taken up as soon as possible, but only where absolutely necessary should flowage to the parkway be permitted, and as little entry as possible be made upon it, for we have to consider that only one side can be assessed instead of two sides as on streets.

During the year petitions will be received for the extension of the sewer, and for sanitary reasons should be granted if possible.

I would recommend that we make a sufficient appropriation.

#### STREET DEPARTMENT.

The decision of the Fore River Bridge matter places one-third the cost of maintenance on us, whereas heretofore our proportion on the old bridge was five twenty-fourths, and adds an increased cost. I fear it will be expensive to maintain, as even now a considerable sum is needed to put it into good condition. This will increase the annual appropriation heretofore made for bridge account.

The trustees of the bridge have ordered the demolition of what was formerly the old toll-house. With that removed, Washington Street can be built to its width at this point.

The new streets laid out and ordered built in the various sections of the city, with the exception of those ordered at the end of the year, have all been completed, meeting in many instances long-standing demands, affording conveniences previously lacking, and increasing in value abutting property. To encourage development in our growing city, it should be our policy to act as liberally as possible and comply with the ordinance relating to streets, as far as our means will permit. We now have about 78 miles of accepted streets, all of them at some portion of the year requiring attention, which, of course, means money.

Where our streets intersect the Quincy Shore Parkway

it will involve changes in grade of some, if not all. Plans are now being prepared, and joint action by the City and Park commission will be necessary, and may involve us in some expense. Later, I will communicate further with you in the matter.

During the year we have renewed a contract with the Quincy Electric Light & Power Company for the usual period of three years, beginning July 1, 1906, on terms enabling us to meet a very large accumulation of petitions for street lighting, without extra cost to the city; so that with a few exceptions present demands are now met.

The Citizens' Gas Company, since its acquirement of the property, has made very extensive additions to its mains, reaching portions of the city not heretofore piped, and is now in position to furnish street lighting, which will later give the city whatever benefits may accrue from competition. Well lighted streets are a protection to life and property of the highest value, and are avoided for their publicity by those intent on crime and misdemeanor.

Last year I called the attention of the Council to the city's need of obtaining the best material of trap-rock character possible, for use on our streets. This is an urgent matter, especially if we are to maintain in good condition our macadam streets. There is heavy traffic on many of our streets of this kind, and it is important we should have the proper material with which to renew them. I think we do not possess it now, and provision should be made by purchase, or lease, to secure a location that will furnish what we require.

I ask your consideration of this matter.

## GRADE CROSSINGS.

The New York, New Haven & Hartford Railroad Company has petitioned the Superior Court to appoint a Com-

mission to take up the question of the abolition of the grade crossings at Saville and Water streets, respectively; the Commission to decide whether the security and convenience of the public require alteration of said crossings, or the discontinuance thereof; to prescribe the manner of the work and whether it shall be done by the city or the R. R. Co.

Both crossings are important arteries of travel, and both dangerous because of their constantly growing use by pedestrians and vehicles. And while none will object to the abolishment of the grade, a discontinuance of the streets will prove inconvenient, detrimental and damaging to many interests.

This is as important a matter as the City can be involved in: and in order to obtain the best results, I hope a plan contributing to improved transit facilities and satisfactory to the interests involved may be obtained. Under the grade crossing Act, we are required to pay not more than 10 per cent. of the cost of same.

### FRANCHISES.

The Old Colony Street Railway's applications for a trolley franchise to convey express matter through our streets were given leave to withdraw last year, but it not improbable that the question may be brought before you.

The status of street railways to a locality has in the past few years undergone radical changes in Massachusetts, brought about by the investment, growth and consolidation of the interests involved. At the time the selectmen of the town of Quincy granted the original franchises, locations were revokable by the same authority if public necessity could be shown. Furthermore, the promoters and investors were local men all of whom were interested in the prosperity and growth of the town, believing it would aid development by opening up outlying sections, and increasing its valuation.

These expectations have all been realized, and franchises then looked upon as of small value have grown to be a considerable asset. Credit must be given the street railway as being a large factor in development, and it is along a clear appreciation of both interests and a mutual understanding whereby both are protected that the highest interest for all may be achieved. What was once a small local affair has by consolidation become part of a system represented by 342 miles of trackage. The local investors and directors have been eliminated, and where once subject to local control, it has now been changed and placed in the hands of a state commission whose approval is required upon any action of the local authorities to impose restrictions in granting further rights and privileges or interference with locations of what is now an extensive system serving numerous communities.

An agreement has been sought in the interest of the city, if the rights and privileges petitioned for were granted, for prompt service and deliveries with lower rates than now existing as partial compensation for the same, as well as a positive knowledge that there will be no interference with the passenger service which at the present time is inadequate on some lines in the city to meet existing demands. My opinion is that more double trackage must be had on the lines referred to if increased traffic with present and future demands are to be promptly met.

I believe the franchise asked for, if granted, is bound in the near future to be of great value to the Company; and if facilities are provided for prompt service and delivery with cheaper transportation rates obtained by the citizens, it will help solve in part some of the industrial problems of the day, and be mutually beneficial.

In my opinion, the requests we have made are not unfair and should be granted prior to favorable action in giving the valuable rights and privileges asked for.

#### FIRE DEPARTMENT.

The new combination apparatus with the necessary horses ordered for Hough's Neck was early in the year put into commission. A bell striker was also placed in the station; and with the permanent man and call men attached to the Company there is an equipment able to cope with the needs of this district, and which affords fire protection satisfactory to the citizens. The City Council has also ordered four fire alarm boxes placed at convenient points, which will further add to the efficiency of the department in this section.

As requested by me last year, an appropriation has been made to divide fire alarm circuit No. 1, which will cover the large property interests in the centre by a separate and distinct line. By using the ducts reserved for the use of the fire alarm in the underground conduits this line will be much better protected and less liable to breaks; therefore affording greater security than heretofore.

During the year the chief engineer changed the so-called running card of the apparatus, dividing the city into districts: the first alarm to be responded to only by the apparatus in that particular district; a general alarm calling for all the apparatus. I consider the plan a good one, as we have many false alarms throughout the year—there is less wear and tear of apparatus, it tends to higher efficiency in both men and equipment, and affords greater protection to the property interests which are more uniformly covered than before.

The ordinance has been changed during the year, creating the rank of captain and lieutenant at the central fire station, which positions have been filled, and increasing the compensation to be paid to permanent men.

#### POLICE DEPARTMENT.

This department has great responsibility resting upon it, but with a strict discharge of the duties by its individual members it is entitled to the co-operation of all law abiding citizens. To obtain the respect of the citizens the conduct of the policemen must be above suspicion. They cannot associate on terms of intimacy with persons whose transactions are questionable, or visit in a friendly way premises with a shady reputation. As the vested guardians of the peace and of the enforcement of law and order, they should appreciate the fact that their conduct must be flawless if they are to inspire respect and orderly conduct in others. Unquestionably, the work of the department is growing, as well as that of all other departments; and it is largely a question of means as to how to provide in sufficient amount to meet the pressing necessities of all. I see no way whereby the work of the force can be made less exacting. It is only by the best endeavor and efficiency of the department that we may hope to meet the wishes of the citizens and improve existing conditions.

During the past year the express law relating to the transportation of intoxicating liquor into the city, became effective. It appears to me that the city council should exercise greater scrutiny and discrimination in granting these licenses. What experience has been had in the operation of the law during the year may be obtained from the records of this department, whose labors and responsibilities I feel have been increased thereby.

I would recommend a closer adherence to the no-license sentiment of the city, and a stricter interpretation of what defines a "common carrier" under the law, to be our guide in further action in this matter.

The ordinance has been changed increasing the force, and compensation to be paid.

#### **NO-LICENSE**

Again the citizens under the local option law have emphatically recorded their decision to pursue the uniform policy of the last quarter of a century. Majorities rule under our form of government, and it becomes those who would do otherwise and favor license, to conform to that decision.

Industrially we are growing very fast; and being made up of a cosmopolitan population, some portions of which have a weakness for strong drink, the temptations to sell it are many. I do not question but that the illicit sale of liquor is daily occurring, but it is surrounded by all the concealment that can be thought of both by the violator of the law and the purchaser. If the law is to be strictly enforced, public sentiment must be active and continued; for I do not think the duty of the citizens ends by simply voting. In many instances they come into possession of information that would, if disclosed, be of value to the police; and the enforcement of the law can be more nearly attained by the combined efforts of all.

Constant vigilance and honest work by the police is imperative, for in no wise can they be relieved of the responsibility resting upon them, and for which I shall hold them fully accountable.

### SCHOOLS.

The question of the needs of our public schools is always prominent, and, with the steady growth in those of school age, promises to continue so. In proportionate numbers, we are above the average, calling for a large expenditure in the current expenses, and making demands upon the municipal debt very largely in excess of all other expenditures combined.

A generous liberality has been the policy of the city in educational matters, but with the large growth in pupils the

present problem in how to provide for them in equal degree as in the past without corresponding increase in the income of the city, which income can only be obtained from property valuations; and a survey in this direction gives but slight encouragement for the immediate future.

The needs of the Coddington district are pressing, but increase in cost of material and labor, with the requirements of the up-to-date school building, represents a large expense, and relief here must await the time when the financial condition of the city can afford it.

An appropriation of \$61,000 was made for the construction of a twelve-room grammar-school building at Atlantic, according to plans and specifications of Hurd & Gore, architects, approved by the school committee, the contract for which has been placed, and it is expected to be completed and ready for occupancy on the reassembling of the school for the fall term.

The building of an addition to the high school involved the demolition of a large portion of the old structure to carry into effect the plans and specifications approved by the school board. A contract was entered into providing for the completion of the work so far as to permit of its occupancy by September first, 1906. While the date of completion was satisfactory to the city, unfortunately, it was beyond the ability of the contractor to fulfil; and while causing inconvenience by which none profited that I am aware of, the opportunity was seized upon by selfish persons from interested motives to indulge, through the press, in campaign bickering and the malignant abuse of those whose efforts were directed to make effective the advantages so long sought. The sinister purposes of its authors, however, were spent in vain effort to convince a discerning public.

Happily the long delay of nearly five years in which this question has been prominently before the various city gov-

ernments, with all its inconvenience and disappointments to teachers and pupils is nearing fruition; and the benefits accruing from a building of substantial construction with all modern conveniences sufficient for the accommodation for increase in future years, are now, in part, enjoyed by the school.

#### \* THOMAS CRANE PUBLIC LIBRARY.

The Library building having become inadequate to the needs of its service, Mr. Albert Crane, with still further liberality toward the City, has already matured plans for an addition to the present beautiful structure. It will consist of a wing toward the North, the upper portion to be used for a stack-room, and the lower for a children's reading-room and stack-room.

During the past year the Trustees have sold the old house on Washington Street, near Coddington Street, built for Gideon F. Thayer years ago, in which Mrs. Esther Hayden for a long time kept the only drug-store in Quincy. The building has been torn down, and the land on which it stood, also the valuable gift of Mr. Crane to the City, will be incorporated with the Library grounds.

## GYPSY AND BROWN-TAIL MOTH INFESTATIONS.

I am informed by the State Agent for this section that, in his opinion, the city is in about the same condition as it was last year, so far as the gypsy moth is concerned. The nest cleaning in the winter of 1905-6 was fairly well done, considering the inexperience of the men employed. The street trees were well protected by burlap bands which accomplished good results. If the trees in the private estates had been as well cared for, the saving in the expense in the work this winter would have been at least twenty-five per cent., and the city in better condition. No town or city can

ever hope to clean the insects from its limits without the faithful use of burlaps. It is the best method yet discovered, and although its use appears, at first, to be costly, in point of fact it is most economical; since its results are positive, it being possible to get every caterpillar, while in the work of nest-hunting, even where the most expert labor is used, the result is problematical, for the best men will miss finding some nests and inexperienced men will leave enough behind them to continue the crop for time eternal. This has been proven by sixteen years' experience.

It is considered that the section to the east of Hancock Street, and Quincy Avenue from Elm Street to the Braintree line, are the worst infested portion of the city, although the insect has now been found generally distributed all over its area. I might, perhaps, except Hough's Neck, for the work done there by the department was exceptionally good, as was also the work done on the street trees. Of course, the woodlands are as yet an unknown quantity, but there is no doubt that they are more or less infested.

It is thought most of the street trees are cleared of the gypsy moth. According to the law, as soon as the time limit set by the notices to property owners to clear their trees has expired, we are called on to enter on those lands and clear them of the insect at their expense, according to law.

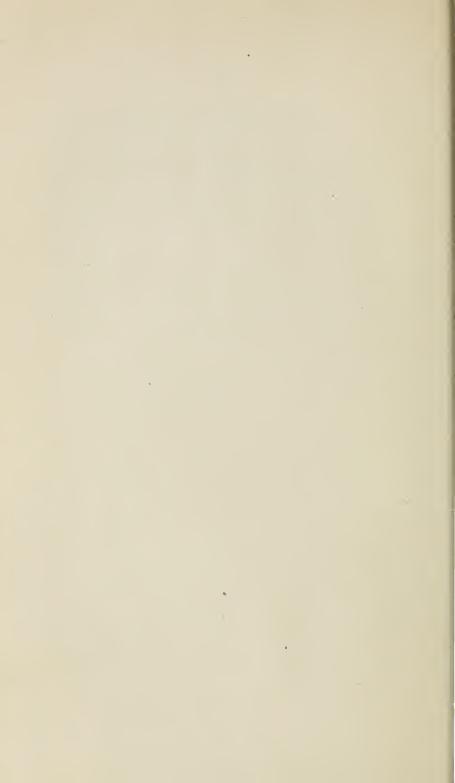

The condition of the city in regard to the brown-tail moth is most excellent. Those sections bordering the water-side were in very bad condition last year, but the work was so well done in cutting off the webs that it is estimated the reduction is fully ninety per cent. There were a few places that were not reached, notably a portion of Germantown and a section of the Point district. In these places there are a number of nests, but the rest of the city is comparatively clean.

The cost of doing all this work is hard to estimate with

any degree of accuracy, but undoubtedly an appropriation the same as that of last year will be needed if the work is to be continued.

Gentlemen: In conclusion, we have been honored by our fellow-citizens with the conduct of their public affairs. Financially, the means of the city are extremely limited, therefore little can be granted during the year to meet the many demands I feel will be made upon you, and which must be refused, not because of any unwillingness on our part to comply with the wishes of those whose servants we are, but because the means of the city will not permit us to do so.

I hope under the conditions existing, and by counselling together as to that which is best, we may conclude our labors at the end of the year with the knowledge that we have performed our duty.

### TREASURER'S REPORT.

City Treasurer's Office, January 1, 1907.

To His Honor, the Mayor:

Herewith I submit the annual statement of the City Treasurer for the year ending December 31, 1906.

### Auditor's Report.

Quincy, January 1, 1907.

To the City Council:

The undersigned herewith presents the annual report of the expenditures of the City of Quincy for the financial year 1906, together with a statement of the assets and liabilities, also a statement of the city debt at the close of the year. The receipts are shown in the report of the City Treasurer. Respectfully submitted,

HENRY O. FAIRBANKS, City Auditor.

## Report of Inspector of Animals

Quincy, Mass., Feb. 21, 1907.

Hon. James Thompson, Mayor of Quincy.

My dear Sir: As Inspector of Animals I have the honor to present the following report.

The cows this fall were in better physical condition than is usually seen on regular inspection. Both cow stables and cows were kept cleaner. Dr. Harrington, in his Boston lectures, considers filthiness of the cow stall to be the greatest cause of contamination of milk. In milking a cow, thick with dirt, a great deal of filth is sure to work into the milk pail. There is room for improvement in some of our stables though the general condition is better than I see elsewhere.

One cow only was killed in Quincy last year for tuberculosis. Another, in quarantine for the same trouble, was illegally sold by the owner who was haled to court and fined. The dealer who was claimed to have received the cow was also fined, but has appealed, as he denies the fact.

There have been six isolated cases of glanders in Quincy horses. Ward reported receiving a horse dead with glanders from a Quincy stable. On visiting that stable your inspector discovered another horse with the disease. This, a newly purchased horse, had evidently infected the one sent away. In another stable the disease was in a comparatively new horse that was possibly infected when purchased.

We have been visited by a new scourge this year, that of rabies. Dogs only have been affected in Quincy. One citizen has taken the Pasteur treatment because of a sore hand which had been exposed to the saliva of a rabid dog.

These cases were distributed about the Centre, Point,

Wollaston, Hough's Neck and West Quincy. In no case was the stray dog that did the biting identified so that we could locate him or his owner.

Rabies is so different from what most people expect that few know it when they see it. Dogs, so often killed during the summer, frothing at the mouth and tumbling about, have simple fits.

The rabid dog does not froth and is not afraid of water, but he does drool. His lower jaw often hangs down as if he had something stuck in his mouth or throat. He has a peculiar howl different from his usual bark. He is apt to eat sticks, dirt and refuse. At first he acts nervous, while later a paralysis sets in. When seen on the street after he has taken to running, he acts all tired out, with head and tail down. He snaps aimlessly at anything in his way. He almost never offers to bite his owner. He dies usually inside of a week.

In consequence of the prevalence of rabies and upon recommendation of the State Cattle Bureau, a request was made in the fall to the Mayor and City Council that all dogs be muzzled, and the order was promptly passed. Since that order only one case of rabies has been discovered.

The question of tramp dogs is not solved, for the police do not like to risk their marksmanship on dogs loose about the street, nor can they dispose of the dead bodies. It would be well if a man with a wagon should go about carrying a net and noose to catch some of the collarless dogs in the city. They could then be placed in pound for two days, where an owner might claim them after showing his license and upon payment of one dollar. I believe the work would be almost self supporting. It would provide a means for the return of dogs who slip their collars, beside disposing of tramp dogs, a menace to the city.

Respectfully submitted,

FRANCIS ABELE, JR.

## Report of Park Commissioners

Quincy, Mass., Feb. 23, 1907.

Hon. James Thompson, Mayor, Quincy, Mass.

Dear Sir: The Park Commission of the City of Quincy offer the following report for the year 1906:

#### MERRYMOUNT PARK.

This park remains in about the same condition as last year.

The expense for tree planting was increased this year considerably on account of the necessity of replacing the large quantity burned by brush fires set by vandals a year ago. For this purpose not only was the appropriation of \$200 used, but quite a sum out of the general park appropriation. Trees have been planted under the care of an expert and have generally done well. The loss mainly has been by destruction caused by brush fires—one during the month of December causing considerable damage.

A reference to the park reports of the past several years will show that much loss has annually been caused by fires. The constant attendance of an officer on the grounds is the only method of preventing this that your Commission can recommend. We repeat our request of a year ago that an appropriation sufficient to justify us in employing such an officer be granted.

All the fences, buildings and grounds have been kept in repair.

Almost constant use has been made of the Football and Baseball fields during the season.

The time seems to have arrived to make a suitable playground and skating rink of the field bordering on the upper part of Black's Creek. We recommended it in our last report.

#### WARD 2.

The grading of this playground in 1905 has made an excellent ball field, which was used constantly during the season.

Much tree planting should be done at this point the coming year. The cedars, which contributed so much to the beauty of this resort, have died off rapidly of late.

#### BATH HOUSE.

The Bath House was liberally patronized the last summer. Centrally located and easy of access, and with attractive surroundings, it is one of the most popular resorts in Quincy during the summer months.

It is hoped, when the Metropolitan Park Commission finally complete their takings and construct the boulevard on the Wollaston shore, that arrangements can be made for a public bath house at that point.

### WARD 3.

The usual repairs to the back stops and fences were made here this year. Little other expense has been incurred as the grading of the past seasons puts the ground in fair condition.

#### WARD 4.

Ð

This playground has had the usual care necessary to maintain it. The lower part near the brook has been much used as a skating field.

#### WARD 6.

This playground, centrally located near the railroad station, is in almost daily use by ball players and others during the summer season.

The large outlay on the grading, etc., in the past years made it unnecessary to spend anything there last season other than the general care.

#### FAXON PARK.

Faxon Park remains in practically the same condition as a year ago. It is little used because of its distance from the centre. Any who have occasion to go that way realize how much is lost to the citizens by the inaccessibility of this beautiful spot. While the road passes the northerly end, a second road from the corner of Water Street and Quincy Avenue, which the city agreed to build years ago, would make this park seem much easier to reach.

Moth pests have fortunately done little harm to the trees on public grounds. With the work on trees done last fall and this winter by city employees, it is hoped that we will escape this pest this year. Fortunately there have been comparatively few found on the parks and playgrounds.

#### CITY FORESTER OR TREE WARDEN.

Again we wish to recommend that the office of City Forester or Tree Warden be established in Quincy at once. In past reports we have recommended that such an officer be put under the Park Commission. If this is not done, we trust that some officer will be designated for the purpose of protecting our trees, who shall be outside of politics and shall have no other public duties.

Other towns have successfully tried the experiment of

appointing as tree warden some public spirited citizen who has served without pay, but in whose hands is placed an appropriation large enough to enable him to employ men to carry out the work of the office as directed by him. We believe this could be brought about successfully in Quincy and at less expense than most any other method.

No itemized account of our expenditures is appended as it can be found in the City Auditor's report.

Yours respectfully,

GEO. E. PFAFFMANN, DEXTER E. WADSWORTH, FRED B. RICE.

## Report of Tax Collector.

To His Honor, the Mayor of the City of Quincy:

I have the honor to submit the following report of the Tax Collector's Department for the year ending December 31, 1906.

The amount of cash collected on the tax for the various years is as follows:

In conclusion I wish to call your attention to the difference in the statement of uncollected taxes and the amount uncollected as shown by the commitment books. These errors, while small, are the result of faulty bookkeeping in the past and are errors which are next to impossible to correct.

Respectfully submitted,

HENRY G. FAY.

## Assessors' Report.

Quincy, Mass., February 15, 1907.

To His Honor the Mayor of the City of Quincy:

The Board of Assessors herewith submit their annual report for the year 1906.

Warrants received and amount raised for current expenses by the assessment of taxes in the city of Quincy for the financial year commencing January 1, 1906, by the Board of Assessors, were as follows:

A State warrant for the proportion of the City of Quincy of a State tax of \$3,500,000.00 . .

\$25,270.00

A County warrant for the proportion of the City of Quincy of a County tax of \$225,000.00...

22,656.90

By the provisions of Chapter 488 of the Acts of the year 1895, entitled "An Act to provide for a Metropolitan Water Supply," we have been assessed for the year 1906 .........

46,314.16

Of this amount \$10,651.63 is to meet the requirements of the sinking fund established under said chapter; \$27,362.35 is to pay interest, and \$8,300.18 is on account of the cost of maintenance and operation for the year 1906.

By the provisions of Chapter 406 of the Acts of the year 1895, entitled "An Act to provide for a system of sewage disposal for the Neponset River Valley," and of Chapter 424 of the Acts of the year 1899, entitled "An Act to provide for the construction of a High

	Charles and Neponset River Valleys," we
23,813.99	have been assessed
	Of this amount \$2,365.95 is to meet the requirements of the sinking fund established under said chapter; \$13,348.38 is to pay interest, and \$8,099.66 is on account of the cost of maintenance and operation for the year 1906.
	In accordance with the provisions of Chapter 407 of the Acts of the year 1893, entitled "An Act to establish a Metropolitan Park Commission," Chapter 550 of the Acts of the year 1896, entitled "An Act relative to the Metropolitan Parks and Boulevards," and Chapter 464 of the Acts of the year 1899, entitled "An Act to authorize the Metropolitan Park Commission to take, control and manage Nantasket Beach and adjacent lands and waters," we have been
12,147.74	assessed  Of this amount \$1,775.71 is to meet the requirements of the sinking fund established under said chapter; \$4,934.73 is to pay interest, and \$5,437.30 is on account of the cost of maintenance and operation for the year 1906.
27.48	In pursuance of the provision of Section 16, chapter 47 of the Revised Laws, we have been assessed
<i>•••</i> ) •••	In accordance with the provisions of chapter 491 of the Acts of the year 1901 entitled "An Act to direct the Metropolitan Park Commission to construct a bridge over the Mys-

tic River between the cities of Somerville and Medford," and chapter 407 of the Acts of the year 1893, entitled "An Act to establish the Metropolitan Park Commission," we have been assessed	210.59
tenance and operation for the year 1906.	
Amount raised for municipal current expenses, based on the valuation of December 31,	
1905, at \$12 per 1,000	301,387.33
City sewer	6,000.00
City debt	79,670.00
Park debt	2,000.00
Interest city debt	19,609.88
Interest park debt	1,440.00
Interest temporary loans	14,000.00
Aggregate of amounts	\$554,548.07
9,239 polls, at \$2.00 each, were recorded for assessment and included in the estimate that determined the rate of taxation for the current year	\$18,478.00
By the operation of the law providing for the supplementary assessment of omitted male persons liable to assessment under the provisions of section 19, chapter 11, R. L., there were added 104 polls, making the number assessed 9,343.	
The amount of estimated receipts lawfully applicable to the payment of expenditures of	

the year, as provided in chapter 12, section 37, R. L., were deducted
SUMMARY OF AMOUNTS COMMITTED TO THE BOARD.
Appropriation order       \$333,360.14         Debts and interest       116,719.88         Water debt, maintenance and interest       78,222.50         Metropolitan water assessment       46,314.16         State tax       25,270.00         County tax       22,656.90         South Metropolitan sewer assessment       23,813.99         Metropolitan park assessment       12,147.74         State highway tax       27.48         Middlesex Ave. or Wellington bridge       210.59         \$658,743.38

Takings of 1903, 50.180 sq. ft	1,700.00
Takings of 1905, 13,405 sq. ft	1,500.00
Takings of 1906, 9,368 sq. ft	372.40

The Assistant Assessors who served during the year were:

George K. Moorehead	Ward 1
Joseph A. Delory	Ward 2
William Pratt	Ward 3
Robert J. Hayes	Ward 4
Charles R. Sherman	Ward 5
Thomas L. D. Gurney	Ward 6

The polls returned by the Assistant Assessors and those registered for the year amount to 9.343—a gain of 520 over the year 1905, made up as follows:

Precinct	T. Precinct 2.	Total.
Ward I 743	940	1,683
Ward 2 1,106	921	2,027
Ward 3 807	888	1,695
Ward 4 701	885	1,586
Ward 5		1,290
Ward 6 549	513	1,062

The personal property, consisting of horses, carriages and cows assessed by the Assistant Assessors, is as follows:

Ward 1		\$71,275.00
Ward 2		35,325.00
Ward 3		37,575.00
Ward 4		
Ward 6	• • • • • • • • • • • • • • • • • • • •	17,750.00

\$248,000.00

The number of dogs returned by the Assistant Assessors is as follows:

Wards	I	2	3	4	5	6	Total
Male							
Female	33	26	20	9	15	35	138
Kennel		I		2		2	5

During the year there has been returned to this office by the Commissioner of Public Works 41 main sewer assessments, apportioned, and 300 particular sewer assessments. With these additions the total number of individual accounts now kept in this office is, viz:

Main sewer assessments	1,901
Particular sewer assessments	
Sidewalk assessments	25
Street sprinkling	1,489
Gypsy moth	35

Each sewer and sidewalk assessment is divided into from three to ten parts: one part with interest on the unpaid balance being added annually to the tax bill of every person affected by these assessments.

The work of this office is rapidly increasing, not only due to the growth of the city, but from the fact that all new matters of assessment seem to be landed in this office—the

latest being the gypsy moth assessments, so that more help will be needed to keep up the work.

The office today, we believe to be a credit to the city, due in a large measure to the care given to every detail by the clerical force, and our citizens find the office a bureau of information. The changes in method due to the introduction of the card system since 1900 have been accomplished only by hard, patient work by the Board and office force; but the system now established, we believe to be of great value, so that the taxes levied on real estate are better equalized, which is the true basis of taxation.

During the coming year a start will be made on plans for Ward 4, which will be of great service. We believe the citizens at large are beginning to understand more fully just the problems that face the assessors, so that they are not called upon so much as in the past to take the responsibility of all the burden placed upon the citizens. We realize that real estate at present has all it can carry, but the citizens must realize that the entire burden of the tax levied rests on real estate, as the personal in our city is of small amount in the large sum to be raised to keep our great corporation in motion.

The pace of our city for the next few years must be slow, otherwise we must have a fluctuating tax rate.

CHARLES H. JOHNSON,
WILLIAM B. GLOVER,
J. WINTHROP PRATT,
Assessors of the City of Quincy.

## Report of Inspector of Milk.

Quincy, Mass., Jan. 20, 1907.

To His Honor, the Mayor of Quincy:

Dear Sir: The inspection of milk has been conducted for the greater part of the year by Dr. F. J. Peirce, who resigned in October, when the present inspector was appointed.

Dr. Peirce's analyses of carefully selected and representative samples, show the milk to be of quite uniform quality, especially in the case of the larger dealers whose product is more likely to meet the scrutiny of the State Board of Health.

In no case was the milk found adulterated. The small dealer is more apt to escape the notice of the State Inspector and for this reason, as well as for the general improvement of the milk supply of the city, I believe it highly desirable that the city should adopt a standard of quality similar to that of the State Board of Health, as well as rules and regulations to govern her milk supply.

I would recommend the following regulations which are similar to those of the Boston Board of Health.

# REGULATIONS FOR THE SALE AND CARE OF MILK.

#### Article T.

Section 1. All persons in the city of Quincy engaged in the production of milk for sale, or in the conveyance in carriages for the purpose of selling, delivering or distributing milk, in said city, shall, annually, on the first day of May, or within thirty days thereafter, make written application to the Inspector of Milk, on forms prescribed by the Milk Inspector, for a license. All persons in the city of Quincy before selling milk, or offering it for sale in a store, booth, stand or market place, shall make written application to the Inspector of Milk, on forms prescribed by the Inspector of Milk, for a license.

- Sec. 2. No person in said city shall engage in the business of producing milk for sale, or in the sale or distribution of milk in the city of Quincy, without a license so to do, under these regulations; said license to be revoked if the licensee fails to comply with the conditions of his license.
- Sec. 3. No milk shall be sold, offered for sale or distributed in the city of Quincy which was drawn from cows within fifteen days before or five days after parturition, nor unless the cows from which it was derived, have within one year, been examined by a competent authority, and shown to be free from diseases dangerous to the public health.
- Sec. 4. Every person having a license to sell, deliver or distribute milk in the city of Quincy, shall keep a copy of the same constantly posted in a conspicuous place on his premises, and shall have his name, the number of his license and his place of business marked in plain, uncondensed Gothic letters, not less than one inch in height, on all vehicles used by him in the conveyance and sale of milk.

#### Article 2.

Section 1. No milk kept for sale or distribution shall be stored in any portion of a building which is used for the stabling of horses, cows or other animals, or for the storing of manure, or in any room used in whole or in part for domestic or sleeping purposes, unless the storage room for

.

milk is separated from other parts of the building to the satisfaction of the Inspector of Milk.

Sec. 2. No person engaged in the business of producing milk for sale, or in the business of storing, selling or delivering milk in said city, shall store, cool, strain or mix said milk in any room which is occupied by horses, cows or other animals. All rooms in which milk is stored, cooled, strained or mixed, shall be provided with tight walls and floor and kept constantly clean. The walls and floors of said rooms shall be of such construction as to allow easy and thorough cleansing. The room or rooms aforesaid shall contain proper appliances for washing or sterilizing all utensils actually employed in the storage, mixing or cooling, sale or distribution of milk, and all such apparatus and utensils shall be washed with boiling water or sterilized with steam regularly after being so used.

Sec. 3. No urinal, water closet or privy shall be located in the rooms called for in the preceding section, or so situated as to pollute the atmosphere of said rooms.

Sec. 4. All milk produced for the purpose of sale shall be strained, cooled or stored as soon as it is drawn from the cow.

#### Article 3.

Section 1. Milk kept for sale in any store, shop, restaurant, market, bakery or other establishment, shall be stored in a covered cooler, box or refrigerator. No vessel containing milk for sale shall be allowed to stand outside said cooler, box or refrigerator, except while a sale of said milk is being made. Every such cooler, box or refrigerator shall be properly drained and cared for, and shall be tightly closed, except during such intervals as are necessary for the introduction or removal of milk or ice, and they shall be kept only in such locations and under such conditions as shall be approved by the Inspector of Milk.

#### Article 4.

Section I. All cans, bottles or other vessels of any sort, used in the sale, delivery or distribution of milk shall be cleansed or sterilized before they are again used for the same purpose, and all wagons used in the conveyance of milk for sale or distribution shall be kept in a cleanly condition and free from offensive odors. No person shall use a milk vessel as a container for any other substance than milk.

#### Article 5.

Section 1. Every person engaged in the production, storage, transportation, sale, delivery, or distribution of milk, immediately on the occurrence of any case or cases of infectious disease, either in himself or in his family, or amongst his employes or their immediate associates, or within the building or premises where milk is stored, sold or distributed, shall notify the Board of Health, and at the same time shall suspend the sale and distribution of milk until authorized to resume the same by the said Board of Health. No vessels which have been handled by persons suffering from such diseases shall be used to hold or convey milk until they have been thoroughly sterilized.

#### Article 6.

Section I. No person, by himself or by his servant or agent, or as the servant or agent of any other person, firm or corporation, shall in the city of Quincy sell, exchange, or deliver or have in his custody or possession with intent to sell, exchange, or deliver, any milk, skimmed milk, or cream which contains more than 500,000 bacteria per cubic centimeter, or which has a temperature higher than fifty degrees Fahrenheit.

Respectfully submitted,

WM. G. CURTIS,
Inspector of Milk,

## Thomas Crane Public Library.

To His Honor, the Mayor of the City of Quincy:

The Trustees of the Thomas Crane Public Library submit herewith their annual report, it being the thirty-sixth of the whole series since the establishment of the Library.

There have been no great changes in the policy or the work of the Library since the last report submitted to your Honor. The Library has gone on its steadfast way. The Trustees have tried to administer its affairs wisely and economically. There have been some things they would like to have done but could not, owing to necessary limitations. They hope, however, to do them in the future.

At the close of the year Miss Amelia L. Bumpus, so long connected with the Library, handed in her resignation. For thirty-five years she has stood in her place with unremitting fidelity. Perhaps it is better that the words of the Trustees at their last meeting should be given entire: "Voted, That the Board of Trustees of the Thomas Crane Public Library have received with great regret the resignation of Miss Amelia L. Bumpus. They assure her that her faithfulness and unfailing urbanity have received the approval of the Trustees and also of the patrons of the Library. Her service has covered the unusually long period of thirty-five years, beginning with the establishment of the Library, and she is to be congratulated on her approaching relief from

her daily labors." Many thanks and much unvoiced gratitude, not only from those associated with her, but also from the public whom she has served so long and well, go with her into her well-earned retirement. It has been a good life and a faithful one.

Miss Alice G. White, who has shared with Miss Bumpus the responsibilities of Library management, will assume the entire charge of the Library on Feb. 1, 1907.

The Library building having become inadequate to the needs of its service, Mr. Albert Crane, with unfailing generosity toward the city, has already matured plans for an addition to his first gift, the present beautiful structure. It will consist of a wing toward the north, thoroughly equipped with the latest modern conveniences, the upper portion to be used as a stack room, and the lower for a children's reading room and stack room. The plan now is for the books to be entirely removed from their present alcoves and the entire space to be devoted to a reading room. This if carried out will be a valuable improvement to the Library, bringing it as nearly as possible up to date.

During the past year the Trustees have sold the old house on Washington Street near Coddington Street, built for Gideon F. Thayer years ago, in which Mrs. Esther Hayden for a long time kept the only drug-store in Quincy. The building has been torn down, and the land on which it stood, also the valuable gift of Mr. Crane to the city, will be incorporated with the Library grounds.

The exhibit of views from the Library Art Club during the year has included the following: Ireland, Alaska, The Alhambra, Scotland, Paris, The Yellowstone, India, Famous Pictures, Views along the B. & M. R. R., Photographs of Lancaster and Milton, etc.

The statistics connected with the Library are given below.

All of which is respectfully submitted,

E. C. BUTLER,
GEORGE W. MORTON,
HARRISON A. KEITH,
HARRY L. RICE,
HENRY McGRATH,
CHARLES R. SAFFORD.

During the year 1906 the Library was opened 305 days, and the number of books loaned was as follows:

Но	me Use.	Schools.	Total.	
Fiction	31,614	119	31,733	41.1

## Report of Overseer of the Poor.

To His Honor the Mayor of the City of Quincy:

In presenting the annual report of this department for the year just ended, I would call to your attention the fact that the annual appropriation is not large enough to meet the necessary requirements of the department. This is a condition which has existed since 1804 and every Overseer has been confronted with a deficit. To those who know the facts this has been expected and the City Council has very willingly provided sufficient funds to meet the unpaid bills, but to the average citizen and taxpaver the matter assumes quite another phase. They look upon the situation in an entirely different light. They believe, and rightly too, that every department should live within the amount which the Mayor says is sufficient and which the City Council has appropriated. They censure the official and cast reflections if he is reappointed. No man with any sense of ambition or pride enjoys being continually placed in such a position. It is discouraging.

It cannot be said that the city could not afford to give the necessary funds in the annual budget, for since 1894 new measures have been adopted, some of which might properly be called luxurious and there has been added expense to other departments which might have been delayed. The poor of the city must be provided for. The widow, the orphan, the aged and the sick must have food, clothing, fuel and medical treatment. The city is not supporting a lot of able bodied people. There may be an occasional impostor, but when found out they are promptly dealt with.

It is a work which must be continued and the city cannot escape paying the bills. Why then refuse sufficient funds in making the annual appropriation? The expenses for the year 1906 have been a trifle more than \$11,000 and the appropriation was \$9,000. When the budget was arranged I asked for more money and I defended the request before the finance committee of the Council, but the budget was so made up that no more could be given. For the year 1907 I do not see how it will be possible to get through with less than \$11,000 and it would be much safer if another \$500 was added. The department would then be in a position to keep within its appropriation and the whole city government could congratulate itself upon having once more, at the beginning, wisely provided for the poor and needy, a thing which had not been done for twelve years.

The Almshouse has been under the care of Mr. and Mrs. William J. Vaughn and they have in every way met all the requirements of their positions. Their work has been conscientiously performed and they have labored faithfully for the best interest of the city. The very creditable comments made by the State Inspector of Almshouses assures me that the city has for superintendent and matron the proper persons. The faithful performance of their duties has caused some disagreeable comments from outsiders, who neither appreciate the real conditions which surround the proper and efficient management of an Almshouse or those who become inmates.

The inmates of the Quincy Almshouse are as contented a lot as will be found in any almshouse or public institution in the State. They are well housed, clothed and fed, many of them better than they ever enjoyed before. I can see where some minor improvements might be made that would add to their comfort. With the limited appropriations these things cannot be gained in one year. What goes into the

Almshouse should be new. It would be folly to make the place a dumping ground for old furniture and old clothing. There are two kinds of old rubbish. There is that which is clean and that which is unclean. You cannot accept from one citizen and immediately turn around and refuse from another. What is the result? If you accept from all it will be but a short time before the Almshouse will again be overrun with vermin of all kinds and the City will be called upon to spend hundreds of dollars to renovate it. To refuse seems to be the wisest course to pursue.

There are several improvements which must be made this year and it may be found necessary to ask for a special appropriation. Having thoroughly renovated the Almshouse to the entire satisfaction of the State Inspector of Almshouses, so that today the city cannot be compelled by the State Board of Charity to make one improvement, a fact which has not existed since the state first commenced regular inspections or more than twelve years ago, I believe something should now be done.

The City spent nearly one thousand dollars for installing bath rooms in the Almshouse. They were not intended as ornamental cozy dens or simply to satisfy the demands of the State Board of Charity. They were intended for use and that purpose has been regularly served during the past two years. Almost the first thing required of a new inmate, if his or her physical condition will permit, is to take a bath. Clean clothes are then given to them.

Bathing for the permanent inmates is required once each week and there are no omissions except in case of sickness. This order was at first evaded in all manner of ways. Some inmates would go into the bath room, put on their clean clothes and after waiting a reasonable time come out. All kinds of excuses were made to avoid taking a bath, until today there are few who object. Some there are, strange to

say, who dislike to be made clean, but as their health depends partially upon cleanliness and in justice to those who readily obey this rule, there are no exceptions made.

All the inmates are required to do such work as they are able. Acting under the advice of the City Physician the work given to each is not injurious to them but serves to occupy their minds and attention and keeps them in a more contended condition.

At the earliest possible date the sewer should be extended and the Almshouse connected with it. The present arrangements are not proper.

Visitors are always welcome at the Almshouse, particularly those who as taxpayers are desirous of seeing that the money spent furnishes the city's poor and unfortunate with a comfortable home. The inmates of any public institution are not there because they want to be, but circumstances force them. It should be plain then to visitors that outside interference spoils the discipline, causes the inmates to become discontented and eventually makes trouble.

In concluding this report the Overseer desires to express his thanks to all those who have assisted in raising the Quincy Almshouse to the high rank it has gained among the Almshouses of the State. In dealing with the outside poor, a problem which has baffled all authorities in every city and town as well as the State itself, there are times when private citizens can render valuable aid to the authorities. Any information which will prevent impostors from receiving aid will be greatly appreciated and promptly investigated.

FREDERICK F. GREEN.

## Report of City Physician.

To His Honor, the Mayor of the City of Quincy:

I respectfully submit the following as the report of the City Physician for the year ending December 31, 1906.

During the year I have made forty visits to the Alms House. To the poor out of the Alms House I have made eighty-five visits and thirteen office prescriptions. To patients to whom I have been called by the Police Department. I have made twenty calls. To contagious cases to whom I have been sent by the Board of Health I have made twenty-five calls. I have examined twenty-eight applicants for positions in the Civil Service and have vaccinated seventy-eight children.

In this service there has been one death which resulted from tuberculosis. Two confinement cases are also included in this service.

During the year the health of the immates of the Alms House has been unusually good. No deaths have occurred there and no continued illnesses other than the chronic ailments incident to those whose advanced age and physical infirmities render them fit subjects for such a charity. The continued good health of the inmates seems to me an admirable testimonial to the intelligent care of the superintendent and matron.

As part of the duties of my office I have made frequent calls at the house at irregular intervals of time and have always found the house and grounds in good sanitary condition and the inmates generally well contented with their lot.

Under the directions of the Civil Service Commission-

ers I held four regular and two supplementary examinations for applicants for positions in the public service as policemen and members of the fire department. Twenty-eight applicants were examined. The physical examination for applicants for these positions is growing more and more rigorous, and to prevent disappointment in those who may think of taking these examinations I insert a few of the direct instructions to examiners. I quote from the form for the physical examination of policemen:

Reject if the applicant has insufficient or defective teeth, provided, however, that if he furnishes within thirty days from such rejection a certificate from some reputable dentist that his teeth have been put in proper condition for mastication, his name will be placed on the eligible list.

Reject for loss of thumb or any part thereof.

Reject for loss of forefinger of either hand or any part thereof above the distal joint.

Reject for malformation of foot that would impair usefulness.

Reject for either complete or incomplete hernia.

Reject for varicose veins.

Reject for excessive weight over 200 lbs. when excess is due to fat, or for obesity, whatever the weight.

Reject if he is under 5 ft. 7 in. in bare feet and 125 lbs. without clothing.

Respectfully submitted,

HENRY C. HALLOWELL, M. D., City Physician.

## Public Burial Places.

Quincy, Mass., Jan. 1, 1907.

To His Honor the Mayor:

The Managers of Public Burial Places respectfully submit the following report for the year 1906.

The constantly increasing demands on this department have been met and carried out as promptly and thoroughly as possible within the appropriation.

The City Council appropriated \$4,000 for the maintenance of the cemeteries for the year 1906, which has been economically expended for the immediate needs, principally in the care of lots, regrading, foundations, etc.

During the year fifteen lots have been sold, for which the City Treasurer has received \$1,336. Sixteen lots have been placed under perpetual care and \$2,600 added to this fund, which now amounts to \$23,563.

The Hancock Cemetery remains in about the same condition as for a number of years past, and has been cared for as far as our funds would allow.

The receipts of this department are paid directly into the City Treasury, and are in excess of the expenditures, as will be seen by the following financial statement.

Appropriation		\$4,000.00
Expended		3,919.75
Balance u	nexpended	\$80.25

## Report of City Solicitor.

To His Honor the Mayor of the City of Quincy:

Sir: I have the honor to make the following report in relation to the legal matters committed to my department during the year.

The most important cases tried during the year were the case of Julia Foley vs. the City of Quincy and the case of Keough Bros. & Co. against certain officials of the City and various labor unions.

The Julia Foley case was for personal injuries received from plaintiff being thrown from an overturned sleigh on Hancock Street during the winter of 1904, and was tried before a jury of the Superior Court for Norfolk County. It was shown in evidence that the accident occurred by the sleigh in which plaintiff was riding being overturned owing to ice and snow on the sides of the track of the Old Colony Street Railway System which sloped from the traveled part of the way to the tracks. At the conclusion of the testimony for the plaintiff, upon motion, the judge directed the jury to return a verdict for the defendant.

The case of Keough Brothers was against the Mayor, Commissioner of Public Works and Aaron H. Gould, architect on the High School building, and the various labor unions, in which the complainant sought an injunction restraining the respondent from interfering with the complainants in the process of the work upon the building and charging a conspiracy to prevent them from completing the work. Upon the conclusion of the testimony the judge ordered the bill dismissed as relating to the Mayor, Commissioner of Public Works and the architect. The case was tried in the

equity session of the Superior Court sitting in Suffolk County.

Several cases were tried in the lower court in which the Board of Health complained of violation of the City Ordinances. A large number of liquor cases were tried during the year in the District Court, for the Police Department, and in all cases a conviction was secured and a heavy fine imposed by the Court. This work was done gratuitously and in addition to the duties of my office as City Solicitor.

I also appeared before committees of the Legislature upon matters which affected the interests of the City.

The question of a reduction of fares on the Nantasket Beach line of the Old Colony Street Railway Co. was pressed before the Railroad Commissioners and they reported in favor of a reduction on that line.

The final hearings on the Fore River Bridge were held during the year and the report of the Commissioners was filed in court and a decree of the court entered confirming the same. This fixes the amount to be paid by the various towns and the City of Quincy and other parties interested for the construction of the steel bridge over the Weymouth Fore River.

The case of Hanrahan vs. the City of Quincy, brought in the Superior Court for Norfolk County, was dismissed in December for want of prosecution.

The usual number of written opinions were rendered during the year and various questions which were submitted to me by heads of departments were answered.

I would again call attention to the necessity of adequate space to care for the law library of the City and that consideration of this matter be given this year.

Respectfully submitted,

WILLIAM R. THOMAS, City Solicitor.

## Police Department.

To His Honor, the Mayor of the City of Quincy:

I herewith submit the annual report of the Police Department for the year ending December 31, 1906.

The force at present is composed as follows: One Chief, one Lieutenant acting as Inspector, two Sergeants, four day Patrolmen, fourteen night Patrolmen, one Wagon-man and one Driver.

During the year the city accepted the act relating to a reserve force and we now have a reserve force of seven men, two of whom are now doing regular night patrol duty.

#### ENFORCEMENT OF THE LIQUOR LAW.

The Liquor Law in our city has been enforced in a more thorough manner than ever before.

Raids have been made in forty places, covering nearly every part of the city, and liquor found in every instance. In all but two cases the liquor has been declared forfeited by the Court.

Thirty-eight have been found guilty and either paid fines, appealed to the Superior Court, or have been committed.

The verdict of the Lower Court has been sustained in the Superior Court in every instance.

In all cases where legal advice was needed the City Solicitor has given his valuable time and services free of any expense to the department. In regard to licenses granted to expressmen to transport liquors, greater care should be observed in the future. It seems to me that we might well cut out all out of town expressmen of which we now have six. Then there are others who cart liquor and nothing else whatever. It does not appear to me that these people can be called legitimate expressmen.

During the year since May 1st, three expressmen have been before the Court and convicted. One was for a violation of the express law and the conviction took away his license.

The others were convicted on a charge of exposing and keeping liquor for sale illegally. They have since gone out of business.

Below follows a detailed account of the Liquor Cases before the Court.

- 50 feet rubber hose.
  - I fork.
  - 2 whips, oil, sponges, etc.

Number of cases investigated by Inspector McKay ....200 Value of stolen property recovered ......\$2,000

#### CONCLUSION.

In closing this report I wish to say that the city has been

remarkably free from any serious crime. There has been one case of manslaughter resulting from a drunken carousal on New Year's Eve. In this case the assaulted party was found dead. His companion was arrested and is now serving a sentence of not less than five nor over seven years.

Drunkenness has increased somewhat under the law requiring us to release on a first offense on an order from the Probation Officer.

I would recommend again that the cell room be connected with the sewer. Also with the consent of the Chief of Fire Department that a double steel cage be installed in the basement of the Fire Station at Houghs Neck.

A colored light in City Square, which could be operated from headquarters, thus notifying the officer on the beat that he was wanted, would be an excellent addition to our present Signal System.

The new law which went into effect September 1st making the juvenile offender a delinquent instead of a criminal, has not been in operation long enough yet to form an idea of its practicability.

The increase in the force giving us a day officer in the northerly section of the city and a night man in the section bounded by Elm, Union, Hancock, Revere Road and the upper end of Washington Street, will greatly assist in keeping order in the districts named.

I wish to again thank His Honor, Mayor Thompson, all city and court officials and also the officers and patrolmen for their unfailing support for the year 1906.

Respectfully submitted,

FRANK E. BURRELL, Chief of Police.

## Board of Health.

January 1, 1907.

To His Honor, the Mayor of the City of Quincy:

The Board of Health respectfully submit their annual report for the year 1906.

The organization of the board remained as it was last year, as follows:

William H. Teasdale, Chairman, Ross K. Whiton, M. D., Secretary, Henry P. Kittredge.

The Inspectors of the Board were as follows:

Edward J. Lennon, Agent,

J. J. Keniley, Inspector of Plumbing,

James F. Allen, Inspector of Meats and Provisions.

The appropriations for maintaining the department were as follows:

Garbage	3,500.00
Miscellaneous	
Contagious Diseases	1,500.00
Nuisances	
Sanitary Inspection	780.00
Brooks	400.00
Collection of Ashes	2,000.00
Lowering Pickett's Pond	150.00

#### GARBAGE.

The contract made with Mr. Michael Crowne of Dor-

chester for the disposal of garbage expired May 1, 1906. The board, after long consideration, deemed it more profitable to sell the garbage direct to the farmers rather than to one man. The result more than justified the change. The house to house collection of garbage has been very unsatisfactory, as for several years past, owing to the lack of proper equipment. The population has increased to such an extent that it is impossible for two teams to cover the city in a satisfactory manner. Our teams are obliged to go through the public streets with the garbage piled above the covers in order to collect all the garbage there is on their routes. This in the summer time is a very improper thing on account of the appearance and odor. Another team is absolutely necessary to properly collect the garbage, as some streets are not collected at all.

#### ASHES.

The subject of the collection of ashes has been before the City Council for several years. This year the council appropriated a sum of money to care for the ashes. Considering this has been the first year we believe the work has been done in a very satisfactory manner. Judging by the way the people appreciate this work it is only a question of a very short time when one team will be unable to do the work.

#### NUISANCES.

During the past year 174 complaints of nuisances have been received at this office. These nuisances were cared for in the same manner as last year, every one having been abated as far as possible, 68 pieces of property being ordered connected with the sewer and 2 houses were ordered vacated.

#### MEDICAL INSPECTION OF SCHOOLS.

Under chapter 502 of the Acts of 1906, "An Act Relative

to the Appointment of School Physicians," five physicians were appointed who have served without pay. During the year 1907 they will receive a salary of \$100, as appropriated by the City Council.

Number of Inspectors	5
Number of Schools Examined	11
Number of Pupils Examined	230
Number of Pupils Excluded	52
Total Number of Pupils Enrolled5	,138

#### BAKERIES.

A complaint was received from the State Board of Health of the unsanitary condition of the bakeries in this city. After an inspection by our Sanitary Inspector, a notice was served upon all owners and tenants of bakeries to put their premises in a sanitary condition, as required by Revised Laws, chapter 75, sections 28 to 33 inclusive. The baker-shops are now either in a sanitary condition or in process of renovation.

#### RECOMMENDATIONS.

Again the Board wish to strongly recommend that the City Council take early action in providing a new Coddington School; that the Old Colony Street Railway Co. be requested to establish a "Comfort Station;" that the City Council appropriate a sufficient sum of money for a contagious hospital; that the necessary funds be provided that the Board of Health may establish a bacteriological laboratory; that the report of the Board of Health of 1905 on the condition of the canal (so called) on Canal Street, be once more taken up and acted upon as recommended in the report.

#### LICENSES GRANTED.

The following licenses were granted by the Board in 1906:

Master Plumbers22
Journeyman Plumbers12
Undertakers 9
Garbage39
Tallow I
Stables granted32
Stable permits refused 3
Stable permits laid on table

#### CONTAGIOUS DISEASES.

This year we were quite fortunate in regard to the number of cases of contagious diseases. The large total is due to an epidemic of measles.

# INFECTIOUS DISEASES REPORTED TO THE BOARD OF HEALTH.

In conclusion we desire to thank His Honor the Mayor and members of the City Government for courtesies received

from them, also the Inspectors of the Board for their hearty co-operation.

W. H. TEASDALE, Chairman, ROSS K. WHITON, M. D., Secretary, HENRY P. KITTREDGE.

Quincy, Mass., Jan. 1, 1907.

To the Board of Health:

Gentlemen: I respectfully submit the following report for the year 1906 as Sanitary Inspector.

Number of premises disinfected for contagious diseases 154, as follows:

Diphtheria 60
Scarlet fever 43
Typhoid fever 1
Cerebro spinal meningitis
Small-pox
Tuberculosis 42
School rooms 5
Pest house I
Number of cesspools ordered cleaned 71
Number of vaults ordered cleaned115
Number of cesspools cleaned777
Number of vaults cleaned977
Impure well water 3
Railroad stations inspected
Locations examined for new stables 36
Number of sewer connection orders served 68
Number of nuisance notices served
Number of notices to vacate property served 6
Garbage licenses issued 39
Tallow licenses issued

### Brooks and Watercourses.

I would say in regard to the cleaning of the brooks and watercourses of this city for the year 1906 that Town Brook, that part of Furnace Brook controlled by the city, and Sachem Brook and their tributaries have been cleaned. I wish to call your attention to a large body of water on the west side of Centre Street which has no outlet. I would recommend that you take action in regard to draining it before warm weather.

Yours truly,

EDWARD. J. LENNON, Sanitary Inspector.

Quincy, Mass., Jan .1, 1907.

To the Board of Health:

# Nature of Buildings Inspected.

Dwelling houses309	
Offices 1	
Churches 2	
School houses	:
·Halls 2	

Stables 2
Factories
Stone sheds 2
Beach cottages
Old buildings connected with the sewer
New buildings connected with the sewer 80
Old buildings connected with cesspools 20
New buildings connected with cesspools 44
Alterations made in old work 28
Aggregate estimate value of work\$62,455.00

In connection with this matter I wish to call attention to the locations selected in some old buildings, especially tenement houses, for the location of water-closets. They are often placed in dark cellars or interior closets without windows or any method of ventilation. This is a great mistake. Every water-closet should be properly located for both light and ventilation, whether it be in new or old houses.

During the year complaint has been made against two plumbers for violations of the plumbing ordinance. This matter has been placed in the hands of the City Solicitor to prosecute, but as yet no action has been taken.

Respectfully submitted,

J. J. KENILEY, Inspector of Plumbing.

Quincy, Mass., Jan. 3, 1907.

To the Board of Health, Quincy, Mass.:

Gentlemen: I herewith tender my report for the year ending December 31, 1906.

S

JAMES F. ALLEN, Inspector of Meats and Provisions.

Report of the Board of Examiners for the Licensing of Plumbers.

Quincy, Mass., Jan. 1, 1907.

To the Chairman of the Board of Health, City of Quincy:

Only one examination was held by the Board of Examiners during the past year. No licenses were issued to the applicants as no one succeeded in the examination.

WM. A. BRADFORD, Secretary.

# Report of City Engineer, 1906.

To His Honor the Mayor of the City of Quincy:

I herewith submit the seventh annual report of the Engineering Department for the year ending December 31, 1906.

The usual appropriation of \$2,500 was passed with the budget and has been expended as follows:

Appropriation		\$2,500.00
Pay rolls	\$2,261.00	
Miscellaneous	108.81	
Office supplies, instruments, etc	130.19	
		\$2,500.00

The following streets or portion of streets have been accepted and laid out as ways of the city during the past year:

	Length.	Width.
Broadway, Ward 2, from Washington St. Southwesterly	1,285 ft.	40 ft.
Hollis Ave. from Newbury Ave. to	, 0	•
Brooks St	1,280	40
Smith St. from Garfield St. to Quarry		
St	1,080	33
Stewart St. from Edison Park		
Northerly	626	40
Total		0
Total	4,271 It.	•81 fillies.

Orders have been written and estimates for construction made for the above-named streets.

The following plans with estimates have been made by request of the Chairman of Committees, or different members of the City Council:

Plan and Profile of Hollis Avenue for acceptance.
Plan and Profile of Broadway for acceptance.
Plan and Profile of Irving Place for acceptance.
Plan and Profile of Pray Street for acceptance.
Plan and Profile of Arlington Street for acceptance.
Plan and Profile of Smith Street for acceptance.
Plan and Profile of Bradford Street for acceptance.
Plan and Profile of Elliot Street for acceptance.
Plan and Profile of Davis Street for acceptance.
Plan and Profile of Muirhead Street for acceptance.

Plan of Butlers Pond and adjoining property.

Edgestone orders and estimates for Faxon Road, Granite Street, Beach Street and Whitwell Street.

## PUBLIC WORKS DEPARTMENT.

All work for this department has been done at the request of the Commissioner.

### STREETS.

Lines and grades have been given for the construction of Maple Street, Cottage Avenue, Freeman Street, Holmes Street, Beacon Street, Bromfield Street and Coe Street. Edgestone lines and grades on Faxon Road, Edwin Street and Wollaston Avenue, also for private owners on other streets. Street lines have been given for twenty-eight (28) private parties. Cross sections and measurements for the amount of gravel taken from Bellevue Pit.

# PUBLIC BUILDINGS AND GROUNDS.

Topographical surveys were made of the Coddington

and Quincy School Lots, and plans of each sent to six different architects. Batters were set for cellar walls for the addition to the High School and the new Quincy School. A topographical survey and plan was made of the Thomas Crane Public Library Lot. By order of the Trustees, a topographical survey and plan was made of the City Hospital Lot for use in connection with the future development of the property.

### SEWER DEPARTMENT.

All estimates, lines and grades for new extensions have been given and record plans made for proper assessments.

### WATER DEPARTMENT.

When requested, lines have been given for new extensions, lengths, sizes of pipe and location of gates noted.

### BOARD OF HEALTH.

Survey and plans have been made by order of the Board for drainage of Pickett's Pond, also for small pond off Grove Street.

# LAW DEPARTMENT.

Plan of Bates Avenue and testimony given in Berlanger Case. Plans of accidents on Chestnut, Sagamore and Washington Streets.

# POLICE DEPARTMENT.

A survey, plan and testimony given for the Samuelson murder trial. Plan furnished of automobile course on Washington Street.

# CEMETERY DEPARTMENT.

All lines and grades were given for new lots, walks and paths, also work done on the new entrance.

### ASSESSOR'S DEPARTMENT.

An appropriation of \$1,000 was made by the City Council early in the year to complete plans of Ward 4. Owing to the fact that this has been a very busy year, the assessor's work has been left until winter. This department expects to have the Word 4 plans well in hand by May 1, 1907.

### STREET NUMBERING.

This work, as in previous years, has been carried on in conjunction with the assessor's work. During the year 26 plans have been made and numbers assigned to 200 houses.

Respectfully submitted,

HAMILTON FLOOD, City Engineer.

# Report of the City Clerk.

To His Honor the Mayor of the City of Quincy:

Marriage licenses

I herewith submit the eighteenth annual report of this office, being for the year ending December 31, 1906.

### RECEIPTS.

zitariage needeeb	4-73.5
Dog license fees	240.40
Other licenses and fees	819.25
Recording mortgages, etc.	132.45
Total	\$1,365.60
The above sum has been paid to the City Trea	asurer.
Number of marriage intentions recorded in 1906	347
Number of marriages recorded in 1906	349
Number of births recorded in 1906	893
Number of deaths recorded in 1906	447

The number of dogs licensed during 1906 was 1,057 male and spayed, 140 females, 5 kennels, for which the sum of \$2,939 was received. Of this amount \$2,698.60 was paid to the County Treasurer, the remainder being included in the above account of receipts as dog license fees.

Annexed are lists of births, marriages and deaths recorded in Quincy in 1906, the election returns for 1906, and the jury list for 1907.

Respectfully yours,

HARRISON A. KEITH, City Clerk.

\$173.50

# Fire Department.

To His Honor the Mayor of the City of Quincy:

In compliance with the provisions of the City Charter I have the honor to present herewith my first annual report of the Fire Department, its makeup and work done during the year ending Dec. 31, A. D., 1906.

#### ORGANIZATION.

The force consists of one chief and three assistant chiefs, eighteen permanent and sixty-three call men, and one superintendent of fire alarm.

#### Assistant Engineers.

Frank C. Packard, Daniel J. Nyhan and George O'Brien.

#### Permanent Men.

Charles P. Costa	Captain
William H. Corcoran	Lieutenant
William A. Ga vin	Superintendent of Fire Alarm
Herbert Griffin.	James Connell.
John Faircloth.	Richard Colbert.
Frank Genero.	James E. Dinegan.
Jerry Lyons.	Alfred L. Mead.
Edward Flaherty.	John Deneen.
Faxon Billings.	Charles Anderson.
Andrew Scully.	William Carroll.
James F. Malone.	Michael E. Scully.

Apparatus and Call Men at Central Station.

One steamer, one combination hose wagon, one combination ladder truck, two spare hose wagons and two hose pungs.

Call Men on Combination Hose No. 1.

James C. Gallagher, Foreman; John F. Desmond, William Erikson, Malcolm A. McDonald, Charles Martin, Alexander Robertson, John Murphy and James E. Maxim.

Call Men on Combination Ladder No. 1.

Murdoch Martin, Foreman; Arthur C. Merritt, John P. Minihan, Mark Myatt, Murdoch McDonald, Samuel Tutton and William Coffin.

Answered 131 alarms during the year, were absent from quarters 87 hours, laid 1,200 ft. of hose, raised 1,123 ft. of ladders, used 37 chemical tanks and 120 extinguishers. Engine in use, 5 hours and 15 minutes. Hydrants in use, 14 hours and 55 minutes.

#### WOLLASTON STATION.

One hose wagon, No. 2, and one combination ladder truck, No. 2.

#### Call Men on Hose No. 2.

G. H. Rhodes, Foreman; S. P. Hanson, J. F. Metherall, W. J. Sands and E. F. Hayden.

Call Men on Combination Ladder No. 2.

Albert Shay, Foreman; Albert Stephenson, Fred Bent, Myles Creamer, Joseph Fratus, John Creedon and Herbert McKay.

Answered 45 alarms during the year, were absent from quarters 32 hours, laid 1,600 ft. of hose, raised 521 ft. of lad-

ders, used 11 chemical tanks and 19 extinguishers. Hydrants in use 2 hours and 15 minutes.

## WEST QUINCY STATION.

One hose wagon, No. 3, and one ladder truck, No. 3.

#### Call Men on Hose No. 3.

Edward Drohan, Foreman; James Dillon, John Curry, John Joyce, Albert Bellibeau and John Callahan.

#### Call Men on Ladder No. 3.

Robert J. Hayes, Foreman; Henry M. Hughes, James Cregan, Edward Farrell, Richard Callahan, Edmund G. Hayden and John D. McNeil.

Answered 53 alarms during the year, were absent from quarters 38 hours and 45 minutes, laid 2,200 ft. of hose, raised 130 ft. of ladders, used 67 extinguishers. Hydrants in use 4 hours and 25 minutes.

#### ATLANTIC STATION.

One combination hose wagon, No. 2.

#### Call Men on Combination No. 2.

J. F. McKinna, Foreman; Thomas Kerrigan, Daniel Golding, Daniel McNeice, Thomas Leary, Walter P. Hill and Cornelius O'Connell.

Answered 26 alarms during the year, were absent from quarters 16 hours and 45 minutes, laid 2,100 ft. of hose, raised 35 ft. of ladders, used 5 chemical tanks and 10 extinguishers. Hydrants in use 1 hour and 50 minutes.

# QUINCY POINT STATION.

One hose wagon, No. 4, and one hose pung.

#### Call Men on Hose No. 4.

Isaac P. Bent, Foreman; Charles W. Hayden, Chris. H. Oliver, Maurice I. Gatcomb, Herbert F. Tucker and John J. Avery.

Answered 29 alarms during the year, were absent from quarters 22 hours and 45 minutes, laid 2,200 ft. of hose and used 31 extinguishers. Hydrants in use 2 hours and 30 minutes.

#### HOUGHS NECK STATION.

One combination wagon, No. 3, one steamer and one hose wagon.

#### Call Men on Combination No. 3.

J. R. S. Ross, Foreman; W. H. Sturgis, J. P. Sullivan, F. H. Ryder, B. B. Comeau, M. Ruddy, C. Faxon, H. B. Vinton, G. A. Now.

Answered 5 alarms during the year, were absent from quarters 3 hours and 15 minutes, laid 450 ft. of hose, raised 25 ft. of ladders, used 2 chemical tanks. Hydrants in use 50 minutes.

#### HORSES.

There are 24 horses in the department. In the past year 2 horses have been put in the department to take the place of old ones, and there were 2 horses added to the department during the year.

#### HOSE.

Number of feet in department, 14,000, 12,000 of which is good and 2,000 fair. Condemned during the year 700 ft. There should be 1,000 ft. purchased during this year.

#### FIRE ALARM.

The following is a list of the appliances used in sounding alarms in the City of Quincy:

- I 6-circuit automatic repeater.
- 6 circuit switches.
- I general switch.
- I ground test switch board.
- ı break key.
- 1 mill amp. meter.
- 6 galvanometers.
- I quartered oak switch board, 4 ft. square.
- I volt meter.
- I amp. meter.
- 6 resistance coils.
- I circuit breaker.
- 6 double throw switches, 12 lamps on switch board.
- 6 test jacks.
- 230 cells of battery, B. T. type.
- 1/2 horse motor for charging batteries.
- I rheostat.
- 3 switches.
- 3 automatic whistles, 2 Gamewell pattern, 1 G. M. Stevens.
- 5 Gamewell tower strikers.
- 1 18-inch combination gong and indicator at Central Station.

Chief Litchfield has two 6-in. gongs, one Gamewell and one Stevens, and a break key.

F. C. Packard has two 6-in. Stevens' gongs, and one d. a. 6-in tapper. D. J. Nyhan has one 6-in. Gamewell gong.

Hose 2 has a 12-in. Gamewell gong.

Hose 3 has a 12-in. Gamewell gong.

Hose 4 has an 18-in. Gamewell gong.

Atlantic Combination has a 12-in. Gamewell gong.

Houghs Neck Combination has an .18-in. Gamewell gong.

Wollaston Foundry has a 6-in. Stevens gong.

Tubular Rivet & Stud Co. one 12-in. Gamewell gong.

O. C. St. Ry. has one 12-in. Gamewell gong.

There are 82 boxes.

There is one 12-in. Gamewell gong at Quincy Electric Light & Power Station.

There are seven boxes of Stevens type.

There are seventy-five of Gamewell type, five of which are succession boxes of the latest type.

There are fifty-eight of the non-interference pull.

There are twelve boxes of the old-fashioned pony Gamewell type.

Four new boxes are to be added at Houghs Neck.

There has been about ten miles of wire added to the system this season, making about 120 miles of wire in the entire system.

About one mile of Fire Alarm System has been placed underground from Central Station to Box 126.

#### ALARMS AND FIRE LOSSES.

During the Year Ending Dec. 31, 1906.

Number of alarms, 186. Number of alarms, bell, 84. Number of alarms, still, 102. Number of false alarms, 17.

Amount of property at risk	\$264,684,00
Insurance on same	101,400.00
Amount paid by Insurance Companies	12,158.25

In conclusion I wish to thank His Honor, Mayor Thompson, for the interest he has taken in the department, and the City Auditor, City Treasurer, City Clerk and the members of the City Council for favors shown to the department during the year. And I also thank the members of the department, both Permanent and Call, for the faithful and

efficient manner in which they have performed the duties which they have been called upon to do.

Respectfully yours,

AMOS L. LITCHFIELD, Chief Engineer Q. F. D.

# Report of the Commissioner of Public Works.

To His Honor the Mayor of the City of Quincy:

Sir: In compliance with the provisions of the City Charter I have the honor to present herewith the eighteenth annual report of the Department of Public Works for the year ending December 31, 1906.

The work of this department includes the construction and care of all public streets, construction and repairs of public buildings, care of street lights, bridges, culverts and drains, sidewalks, street watering, removal of snow, water construction, maintenance, installing of water meters and sewer construction, maintenance and house connections.

The City Council passed 50 orders belonging to my department authorizing an expenditure of \$258,645.69.

The following tables show appropriations, expenditures and balances, but for a detailed statement of expenditures for each appropriation I would refer you to the itemized report of the City Auditor.

Annual Budget	Appropriation	Expended	Balance
Bridges, culverts and

# BRIDGES, CULVERTS AND DRAINS.

Considerable work has been done on the various bridges

throughout the city, the most extensive repairs being on the Neponset bridge, Bates Avenue and Beale Street bridge.

It will be necessary the coming year to replank the Neponset bridge and paint the Warren Avenue bridge.

The catch basins and drains were thoroughly cleaned after each storm.

The cleaning of brooks is now under the direction of the Board of Health, having been transferred from my department.

The Metropolitan Park Commission rebuilt the culvert across Willard Street under an agreement that the city pay one-half cost of construction amounting to \$564.92.

The city's portion of assessment levied and paid for repairs and maintenance of the Fore River bridge amounted to \$550.

#### FORE RIVER BRIDGE.

It may be of interest and also for future reference to have the report of the special Commissioners who were appointed by the Superior Court to assess the cost of the bridge over the Weymouth Fore River which was filed October 13, 1906.

The cost incurred by the county of Norfolk pursuant to chapter 456 of the acts of 1900 and acts in amendment thereof and in addition thereto was \$104,976.43, together with interest of \$17,461.29, making total cost of bridge \$122,437.72.

This amount was apportioned as follows:

City of Quincy,	33%	Cost \$34,642.22	Interest \$5,762.22	Total \$40,404.44
Town of Weymouth Town of Hing-	10%	10,497.64	1,746.13	12,243.77

*		
•		\$5,000.75

In addition to the above expenditures the Council passed a special appropriation of \$2,500 for installing a system of plumbing in the Massachusetts Fields School and connecting same with the sewer.

Proposals were advertised and contract awarded to J. E. Keniley & Co. for \$1,787, they being the lowest bidders.

Work was immediately commenced and consisted of installing fifteen closets in the girl's basement, eight closets and seventeen Alberene urinals in boy's basement.

Two Alberene soapstone sinks were installed outside of original contract.

The installing of this plumbing system necessitated considerable carpenter, painting and concrete work and proves a great improvement over the old system.

Also \$300 was appropriated and expended in building a bulkhead at the Gridley Bryant School and installing a sink in the basement for the janitor.

#### STREET WATERING.

The watering of streets was done in the usual manner by the electric car sprinkler and five carts on streets ordered watered by the Council from April 15, 1906, to October 15, 1906.

Assessment was levied on 161,200 linear feet at \$.023 per linear foot—one-half cost of same being assessed on abutting property owners.

#### STREET LIGHTING.

The contract for street lighting with the Quincy Electric Light & Power Co. expired July 1, 1906.

In renewing the contract a reduction in price was obtained and a contract for three years was entered into July 1, 1906, at the following price:

\$70.00 per arc light per year of 1,200 candle power.

\$16.50 per incandescent light per year of 25 candle power.

We have installed at the present time 166 arc, 641 incandescent and 20 gas lamps, an increase of 48 incandescent and 4 gas lamps.

#### EDGESTONES.

Edgestones were set and gravel sidewalks built upon application from abutters agreeing to pay one-half cost of same in front of the following property:

John H. Chandler	Edwin	Street
Charles E. and Thomas R. Bentley	Edwin	Street
Julia V. B. Johnson	.Faxon	Road
Fanny A. Coles	.Faxon	Road
Annie M. Bates	.Faxon	Road
Charles E. and Thomas R. Bentley .	.Faxon	Road
Marion G. Phillips	.Faxon	Road
Alfred Johnson	.Faxon	Road
Daniel A. Bruce	.Faxon	Road

The above work consisted in furnishing and setting 870.2 feet straight and 62.3 feet curved edgestones and building 631 sq. yards gravel sidewalk.

#### HIGHWAYS.

This appropriation was expended in the usual manner in the general repair and care of streets and sidewalks, maintenance of horses, repair of carts and harnesses, purchase of tools, material, etc.

Repairs were made on almost all of our streets, sidewalks resurfaced, cross walks relaid and gutters paved.

Special attention was given to cleaning of streets and crossings.

The Street Railway Excise Tax was expended in repairing and resurfacing streets upon which car tracks are located.

Twenty new street signs were erected and several old ones repaired.

368 permits were issued for street openings, moving buildings, parades, etc. Most of these permits were issued to the Citizens' Gas Light Co. for extension of their mains, house connections and repairing leaks.

The following streets were accepted by the Council and laid out as public ways of the city:

Broadway, from Washington Street to Southerly, 1,285 ft. long, 40 ft. wide.

Hollis Avenue, from Newbury Avenue to Brooks Street, 1,280 ft. long, 40 ft. wide.

Smith Street, from Garfield Street to Quarry Street, 1,080 ft. long, 33 ft. wide.

Stewart Street, from Edison Park to Northerly, 626 ft. long, 40 ft. wide.

#### GYPSY AND BROWN TAIL MOTHS.

Considerable work has been accomplished during the past year towards the extermination of the Gypsy and Brown Tail Moths.

A careful search was made during the winter months to destroy all nests. In the spring the street trees and trees in the parks and on city property were protected by bands of burlap. Excellent results were obtained by burlapping trees during the caterpillar season.

Considerable work was done on private property, but not as much as we expect to do the coming year.

The dead limbs have all been carefully cut from the trees and all holes and crevices were either covered with tin or cement so as to avoid the harboring of Gypsy Moths.

This work is all done under the direction and supervision of the State Inspector.

Printed notices giving full instructions as to the suppression of the Gypsy and Brown Tail Moths were sent according to law to all property owners asking their co-operation with the city in destroying all eggs and nests found on their property before January 1, 1907.

#### SPECIAL APPROPRIATIONS.

The following appropriations were passed by the City

Council late in the year 1905 and work performed in year 1906.

An appropriation of \$11,298.30 was expended in the widening and grading of Maple Place from Chestnut Street to Washington Street. Of this amount \$9,848.30 was paid for land damages, leaving balance of \$1,450 for construction of street.

The building of this street necessitated the removal of trees, moving fences, building retaining wall, macadamizing the roadway and setting edgestones on both sides of the street.

845.6 feet straight and 127.1 feet curved edgestones were set, one-half cost of which was assessed on abutting property owners.

The laying out and widening of this street as a public thoroughfare of the city is a much needed improvement and is greatly appreciated by the general public.

Cottage Avenue was widened and graded from Chestnut Street to Hancock Street under an appropriation of \$8,000, of which \$3,188.60 was for land damages and \$4,811.40 for construction of street.

The building of this street included the moving of buildings on property belonging to the estate of A. B. Packard and Frank C. Packard, cutting down trees, moving and building fences, raising manholes and building catch basins and drains, paving gutters, macadamizing the roadway and setting edgestones on both sides of street.

602.4 feet straight and 130.1 feet Curved edgestones were set, one-half cost of which was assessed on abutting property owners.

Edgestones were laid and gravel sidewalks built on the westerly side of Faxon Road from Charles Street to Edwin Street under an appropriation of \$425. Work consisted of furnishing and setting 444.2 feet straight and 77.5 feet

curved edgestone and 340 sq. yards gravel walk—abutters paying one-half cost of same.

Paved gutters were laid on both sides of Goddard Street from Verchild Street to Independence Avenue under an appropriation of \$1,200.

\$700 was appropriated and expended in repairing and resurfacing Walnut Street.

\$500 was appropriated and expended in the laying out and grading of Holmes Street from Squantum Street to Billings Road.

Stone cross walks were constructed across the southerly side of Saville Street, one from the Post Office building on Granite Street to Hotel Greenleaf and one at the West Quincy Depot under an appropriation of \$800.

\$600 was appropriated and expended in the laying out and grading of Freeman Street from Billings Road to Vassal Street.

\$900 was appropriated and expended in laying out and grading on Bromfield Street from Gould Street to Mason Street.

\$200 was appropriated and expended for the draining of Gragg's Pond.

Edgestones were laid and gravel sidewalk constructed on the southerly side of Edwin Street near Faxon Road, a distance of 75 feet, under an appropriation of \$100, abutters paying one-half cost of same.

\$300 was appropriated and expended in laying out and grading of Curtis Street from the easterly line of Ryden Street to the westerly line of Farrell Street.

\$500 was appropriated and expended for the laying out and grading of Beacon and Storey Streets from Washington Street to Commonwealth Avenue.

\$150 was appropriated and expended for the widening of Bates Avenue at a point about 182 feet south-westerly

from Willard Street, of which amount \$50 was allowed for the taking of about 445 sq. feet of land.

Edgestones were laid and gravel sidewalks constructed on the westerly side of Wollaston Avenue from Fenno Street to Hancock Street under an appropriation of \$700, consisting of 662.97 feet straight edgestones, I block corner and 459 sq. yards gravel walk, one-half cost of same being assessed upon abutting property owners.

\$1,500 was appropriated for the laying out and grading of North Payne Street from Payne Street to Franklin Street, of which amount \$1,080 was for land damages.

#### HIGH SCHOOL ADDITIONS AND ALTERATIONS.

The Council passed an appropriation November 6, 1905, for \$113,000 and a further appropriation January 8, 1906, for \$6,500 for additions to and alterations of the Quincy High School according to plans and specifications of Aaron H. Gould, Architect.

Bids were advertised for December 28, 1905, and contract awarded January 19, 1906, to Rufus E. Lord of Waltham for \$110,500.

Contract called for the completion of the new building, including sanitaries, steam heating system and that portion of the first and second floors of old building now used for class rooms on or before September 1, 1906, and the completion of the remodelling of the Assembly Hall in the old building and alterations on roof on or before October 20, 1906.

Owing to unavoidable delays the building was not completed on the above dates, but fourteen class rooms were practically ready for occupancy when school opened in January, 1907.

It is only a question of a short time when building will be wholly completed, giving us an up-to-date building in every respect with all modern conveniences which will accommodate about one thousand pupils which we hope will meet all demands in this direction for a number of years.

#### HIGH SCHOOL FURNITURE AND FURNISHINGS.

An appropriation of \$13,000 was made for the purchase of furniture and furnishings for the Quincy High School.

Proposals were advertised for school furniture and contract awarded to the American Seating Company of Boston and R. Holman & Company of Chelsea.

The wardrobe fittings were furnished by Chandler & Barber.

The Electric Clock system was installed by the Standard Electric Time Co.

The curtains and fixtures were furnished by the Allen Shade Holder Co.

The electric light and gas fixtures were furnished and installed by McKenney & Waterbury Co.

The fitting up of the lecture room, supply rooms and laboratory was done by George E. Thomas.

All the old furniture has been renovated.

#### WARD SIX SCHOOLHOUSE.

The Council passed an order July 2, 1906, appropriating \$61,000 for the erection of a twelve-room brick school building on Newbury Avenue, Atlantic, in accordance with plans and specifications of Hurd & Gore, Architects, and approved by the School Committee.

Bids were advertised and contract awarded November 1, 1906, to Marr Brothers for \$57,512, they being the lowest bidders.

Work on the foundation was immediately commenced and considerable progress has so far been made.

The contract calls for the completion of building on or before August 1, 1907, which will allow ample time in which to furnish the building and have it ready for occupancy when school opens in September, 1907.

Paved gutters were laid on the west side of Grand View Avenue between Marion Street and Lincoln Avenue under an appropriation of \$225.

The following orders were passed late in the year and money not available until January 1, 1907.

Broadway Street grading	\$2,500.00
Elm Avenue sidewalk	700.00
Farrington Street drain	750.00
Highland Avenue drain	500.00
Hollis Avenue grading	2,500.00
Liberty Street grading	3,000.00
Smith Street widening	3,300.00
Whitewell Street sidewalk	2,500.00

#### SEWER DIVISION.

The work of sewer construction for the past year has been carried on in all wards of the city, but principally in completing the main through the Fore River Shipbuilding Company's Yard. This sewer was completed about the middle of last September, but as yet the Shipbuilding Company have not availed themselves of its use.

A great deal of the year's work was of a difficult character, the excavation consisting of ledge at various depths. This includes the main sewer through the Ship-yard, East Howard Street, Pond, Washington and Union Streets, Buckley Street and Linden Place.

All of these sewers, with the exception of the last named, were built by order of the Board of Health. Linden Place averaged from sixteen to nineteen feet in depth and the ex-

cavation consisted of a large, coarse gravel, bowlder gravel, which presented difficulties both in the removal and replacement.

During the year \$20,000 was appropriated for the purpose of sewer construction. Of this amount \$3,750 was expended to settle the Shea and Fogelgren cases, and \$1,361.20 to pay the deficiency of 1905, leaving approximately \$14,888.80 for actual sewer construction.

The following list shows the streets in which sewers have been constructed during the past year, the length, size of pipe and number of manholes.

Bradford Street from Franklin Street to Eliot Street, length 368.8 feet, size 8 inches, 2 manholes.

Buckley Street from Arthur Street to 163.1 feet northerly, length 163.1 feet, size 8 inches, 1, manhole.

Cushing Street from Woodbine Street to Wayland Street, length 340 feet, size 8 inches.

East Howard Street, from Sta. 21 + 00.46 to Howard Avenue, length 466.39 feet, size 8 inches, 3 manholes.

Eliot Street from Bradford Street to Payne Street, length 427.23 feet, size 8 inches, 2 manholes.

Fore River Yard from Sta. 2 + 60 to Howard Avenue, length 1,032.05 feet, size 12-15 inches, 6 manholes.

Gordon Street and School Yard Northerly and Easterly, length 232.55 feet, size 8-5 inches, 1 manhole.

Greene Street from Elm Avenue to 250 feet easterly, length 250 feet, size 8 inches, I manhole.

Linden Place from Greenleaf Street to 187.22 feet southerly, length 187.22 feet, size 8 inches, 2 manholes.

Merrymount Road from Marginal Road to Hancock Street, length 313 feet, size 8 inches, 2 manholes.

Pond Street from Station O to Washington Street, length 288 feet, size 10 inches.

Union Street from Washington Street to Sta. 2 + 70, length 270 feet, size 8 inches, 1 manhole.

Walker Place from Prospect Street to the end, length 160.8 feet, size 8 inches, 1 manhole.

Washington Street from Pond Street to Union Street, length 249.65 feet, size 10 inches, 2 manholes.

Whitwell Street from Ryden Street to Farrell Street, length 232.35 feet, size 8 inches, 1 manhole.

Total, 4,981.14 feet, 25 manholes.

#### PARTICULAR SEWERS.

A greater number of connections were made with the public sewer last year than in any previous year, the total number being three hundred and seven (307). These, with the exception of a very few, were laid with five inch clay pipe and the work of construction was done entirely by the city. The average cost of these connections was \$25.99 per connection or \$0.528 per foot. The average length of the connections was 49.18 feet. The number of feet laid in house connections during the year was 15,106.07—making to date a total of 19.07 miles.

The money for house connections is almost exhausted and in order to satisfy the demands of the people an appropriation should be made at once that the work may be begun as soon as the weather will permit.

The following table shows the number of connections put in this year in each ward:

Ward I	6	7
Ward 2		O
Ward 3		6
Ward 4		5
Ward 5		7
Ward 6		2

During the year there were five stoppages. These were caused by carelessness and the indiscriminate use of newspaper and throwing of rubbish and fruit into the closets. In comparison with the number of connections this is not a very bad showing.

#### MAINTENANCE.

The maintenance of the sewers, that is the flushing and cleaning, has been performed at regular intervals during the year with the exception of the early spring when we were so busy on house connections. The amount of money appropriated for this purpose is so small that it is impossible for us to keep any permanent men and consequently leaves the department in a crippled condition should we want men in a hurry.

Previous to the abolishment of the Sewerage Commission, when the maintenance of the completed portion of the system was managed by the Commissioner of Public Works, the total number of miles maintained was twenty-three with an appropriation of \$1,500. Today with an appropriation of \$1,800, a system of almost fifty miles, or more than double, must be maintained and kept in good condition for one-fifth as much more money.

I also think it advisable that the expense of the office should be paid from the maintenance account, but it is impossible under present conditions as the appropriation is inadequate.

There are on file several petitions for the extension of the sewer and also several orders pending in the City Council. I think it advisable that these orders be recalled and introduced again under one loan to cover them all. In my opinion it is not good policy to make a specific appropriation for each street, for, on account of the varied and uncertain character of the soil, the cost may exceed the estimate and the work cannot be finished until further recourse is had to the City Council. By one loan to cover all and enough to provide for other extensions, which are invariably petitioned for after the work of construction is begun, I think the work can be carried on in a more satisfactory manner.

It is a lamentable fact that year after year the work is begun so late that we lose two or three months' valuable time and the work is necessarily carried into the winter. This is caused by reason of the lapse of time before the money becomes available after the order has been passed by the City Council.

#### WATER DIVISION.

The work of the department for the past year has been making extensions of water mains where requested, putting in new service pipes, installing meters and making necessary repairs on mains, gates and hydrants.

A twelve-inch main was laid from Hancock Street through Bridge and Adams Streets to Oakland Avenue. This main was substituted for the four-inch main which was considered inadequate to supply the present demand. We hope this year to complete the work by laying a twelve-inch pipe from Oakland Avenue to Whitwell Street. By doing this it will give a continuous large main from the Metropolitan supply at the Milton line to Hancock Street, Quincy, thus improving the service, giving letter pressure and fire protection for the city.

On Walnut Street, Atlantic, a two-inch pipe was taken up and a four-inch main laid.

There were several small extensions made where new houses are being built, which will be a source of revenue for the city.

On April 23, 1906, an order was passed by the City Council authorizing the Commissioner of Public Works to

install a system of metering the entire water service of the city and on May 21, 1906, an order appropriating \$10,000 for this purpose was passed by the Council.

In the purchase of meters there were a great many different kinds to be considered and the Empire Meter, manufactured by the National Meter Co. was the one approved by the Mayor, therefore 625 Empire meters were purchased, the sizes and prices being as follows: 5/8 inch \$10.40, 3/4 inch \$15.60, 1 inch \$20.80, 2 inch \$60.

Meters were first installed on all manufacturing plants. polishing mills, laundries, business blocks and boarding houses.

This being done, a start has been made to meter the fully plumbed houses in the different wards in the city.

During the year 653 meters were set making the total number now in use 847.

The meters in use at the present time are as follows:

604 Empire, 157 Trident, 24 Union, 22 Crown, 18 Nash, 13 Hersey, 3 Gem, 3 Worthington, 1 Keystone, 1 Lambert, 1 Thompson.

Each year the receipts of the department are increasing, this year having been \$105,053.50. In addition to these receipts it should also be considered that this department is furnishing water to the amount of about \$30.000 to all city departments, free of charge.

Total assessment for water rates		
for 1906		\$110.461.68
Amount rebated for vacancies and		
non use of fixtures	\$3,607.20	
Amount due from 1906 assess-		
ment	2,688.85

		\$110,461.68
Amount collected on 1905 assess-		
ment	1,272.26	
Amount collected on 1906 assess-		
ment	103,781.24	
Total amount collected for the year		
ending December 31, 1906		\$105,053.50

The total number of feet of street mains laid was 8,588 feet, making a total length of street mains 536,774 feet.

During the year 216 new service connections were made at a total cost of \$5,620.97, of which \$3,244.28 was charged to the consumers and \$2,376.69 charged to the city.

The following tables will show miles of pipe, number of hydrants and gates, also location of pipe, hydrants and gates put in during the year.

In conclusion I wish to thank His Honor the Mayor, the members of the City Council, the clerks, foremen and employes of my department for their advice and assistance.

Respectfully submitted,

THOS. F. BURK, Commissioner of Public Works.

## Woodward Institute.

To the Mayor and City Council:

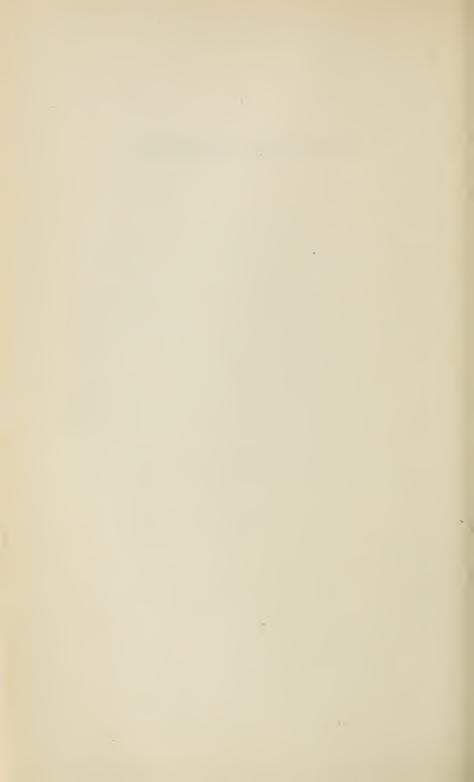

Gentlemen: The Directors of the Woodward Institute submit their report for the year 1906. During the year the Board has held six regular and two special meetings. At all of these meetings Superintendent Frank E. Parlin has been present, and has given full statement concerning the general condition of the school. He has added suggestions in the way of firmer maintenance and larger efficiency. His report as adopted appears on the following pages.

In the preparation of this introduction I have attended the Institute in session, visited recitations, examined methods of instruction, talked with the principal and teachers, to find independently that the purpose of the Institute is being adequately carried forward.

Unusual harmony and interest exist between the faculty and the superintendent, which argues for the continuance of the present policy.

> J. S. MILLER, For the Board of Directors.

January 1, 1907.

## Report of Superintendent.

To the Board of Directors of Woodward Institute:

Gentlemen: The report herewith submitted is, in the series of annual reports of Woodward Institute, the thirteenth, and of the superintendent the sixth.

Education is not a thing which can be marked off, examined and fully measured up year by year. The important or essential part of it lies not in the processes of instruction but in the effect upon the growth, development and character of the pupils, which is not easily measured, especially at short intervals. It is possible to judge with a high degree of certainty whether the means used are adapted to produce the desired results and whether the growth and development are in the right direction. That is, we can provide appropriate conditions and can determine the general character of the results of our work, but the only real measure of its effectiveness will be found in the lives of our pupils through the years to come. Nor can even this measure be exactly written down in percentages, because those lives will be made up of two parts, the external or their relations to persons, things and events, and the internal or the condition which prevails in the mind itself—the soul-life of the individual—the most important factor of all and the one which is beyond our reckoning. Even the measure of the external life depends largely upon the standard used. If we measure it by the material things one gathers about himself and possesses—by what he receives—we may get a very different result from what we do when we measure him by what he has added to the sum of human happiness and goodness—by what he has given to the world.

Thus it is never possible to state definitely just what has been accomplished in the education of the pupils of any school during a single year. We can do little more than state the conditions under which the work has been done and infer the permanent results from the methods used, from the increase of power shown and from the general attitude toward responsibility and the opportunities offered. The interest and effort of both pupils and teachers have been good. On the whole, the teaching was never better nor the work more satisfactory.

Just before the opening of the September term a request was received from the School Committee of the city that they be permitted to use the Woodward building afternoons for the purpose of holding recitation of high school classes. the completion of the new high school being unexpectedly delayed. After being assured by competent legal opinions that the request could be granted without endangering in any way the endowment of Woodward, the Board of Directors voted to allow the School Committee to use the building as proposed from one forty-five to six o'clock, at a rental thought sufficient to cover the extra cost of fuel, light, janitor service and the wear and tear of the building. At the time this arrangement was made, it was expected that the high school would require the use of the building not more than eight or ten weeks, instead of nearly four months, as it proved. During this period, of course, the Woodward pupils and teachers were deprived of the use of the building afternoons and were obliged to omit all meetings and exercises usually held at that time-social gatherings, library work, gymnasium practice, class and teachers' meetings. teachers have not been able to give as much outside help as was desirable nor to secure the making-up of lost lessons as

satisfactorily as usual. Although there was a perceptible loss to the Institute pupils the larger interests of the community seemed to justify the sacrifice under the circumstances.

The attendance during the year has not only been the largest in the history of the school but the most regular, it being 93.8 per cent. in place of 93 per cent. last year. The number of cases of tardiness and of dismissal continued to decrease, the decrease being 12 per cent. in the former and 25 per cent. in the latter.

The following table shows the class and total enrolment of pupils each year since the school was opened, also the number of regular and special teachers employed.

	y.			s				TES		ТЕ	TEACHERS			
1	SRVENTH CLASS		FIFTH CLASS	FOURTH CLASS	THIRD CLASS	JUNIOR CLASS	SENIOR CLASS	Post GRADUATES	Тотаг	REGULAR	SPECIAL	TOTAL

The graduating class last June numbered thirty-four, the largest ever sent out from this school. Of these eleven either entered college, normal or other schools in the fall and nine returned to the Institute for special graduate work.

The class which entered in September was also the largest in the history of the school, numbering fifty-one. It seems to be the opinion of the teachers that this class was well prepared and rather above the average of entering classes in ability.

Special attention during the year has been given to the work in Latin and science with gratifying results in both subjects.

In Latin, by systematic weekly reviews the fundamentals of the language are more firmly fixed in the minds of the pupils and the interest in the work largely increased. In science, the first year pupils have begun the laboratory work earlier than usual and have given more time to this method of study. Greater interest and better results have followed the introduction of modern methods in teaching zoology made possible by new text and reference books in this subject.

A new departure this year in household science has been the buying of supplies for the cooking class by the pupils themselves, under the direction of the teacher. In this way the pupils learn how to select goods, how to buy economically and also something of the expense necessary to maintain this part of a home. There are seventy-six pupils in this department, fifty-three taking the first year course and twenty-three the second.

A recent test of the sight and hearing of the pupils revealed fifteen per cent. defective in sight and five per cent. defective in hearing. This is not an unusually large proportion for a school of this kind.

The general health of the students has been good during the year. In fact, there seems to be a constant improvement in this respect. The membership of the school has increased so much during the last few years that the dressing-room connected with the gymnasium no longer provides sufficient locker room even after much overcrowding. Additional accommodations will have to be provided in the near future.

During the year gifts as follows have been received: "Rembrandt" from Miss Grace F. Spear, member of the class of 1906; two pamphlets, "The Effect of Footwear on the Form and Usefulness of the Feet," and "Conclusions Drawn from a Comparative Study of the Feet of Barefooted and Shoewearing Peoples" from Miss Maccarty, Director of Physical Culture; The Manual of the General Court, 1906, and a complete set of the Calendars, Journals and Documents of the House and Senate for the session of 1906, seven volumes, from Representative Eugene C. Hultman. Two of the teachers, Miss Bates and Miss Burgess, have presented photographs of special interest to the pupils of the school.

The policy of making substantial additions to the library and laboratory equipment has been carried out this year as usual. Some much needed apparatus for the gymnasium has also been provided; and twenty new desks and chairs were purchased for the assembly hall.

The school plant has been improved by putting in a Berryman heater to heat the water before it enters the boiler. As this is done by means of the exhaust it is without cost and saves the additional heat which would be required if the cold water were put directly into the boiler, besides protecting it from a very severe strain.

During the summer vacation the building was painted two coats and all necessary repairs made to put the outside of the building in good condition. Many minor improvements and repairs have also been made within the building.

With a sincere desire to give full credit for the effort and good work of both pupils and teachers and with a firm conviction that the school is developing in a wholesome and efficient manner, I submit this report.

Very respectfully,

FRANK E. PARLIN,
Superintendent.

December 31, 1906.

#### EXPLANATIONS.

Required work includes subjects which all pupils are expected to take unless excused by the Principal.

With the consent of the Principal a pupil may select from the electives as many subjects as her health and ability will warrant. Ordinarily she is expected to elect not less than twelve (12) nor more than fourteen (14) periods per week. The approval of parents should accompany any request to take a greater or less amount of work.

In the column marked "periods" is indicated the number of exercises per week.

In the column marked "credits" is indicated the number of points allowed for satisfactory work in each subject. A total of eighty (80) points or credits entitles a pupil to a diploma. One additional credit will be allowed each year for excellence in conduct and effort.

A pupil in any class may elect from the preceding years' lists any subject which she has not satisfactorily completed.

#### DEPARTMENT OF ENGLISH.

#### LITERATURE.

The first two years of the course in literature are spent in reading carefully, but without attempting analysis and criticism, as much of the world's best literature as the time will allow. The books are selected because they are adapted to the minds of the readers and are worth reading. They include not only English classics but good translations from the literature of various nations and cover many subjects. There are three distinct aims in the course: (1) to teach the students to read intelligently and enjoyably; (2) to develop in them a taste for good literature; (3) to lay a broad foundation for the subsequent study and appreciation of the English classics selected for the third and fourth years. These are taken up in the order of narration, description, exposition, and argument. An outline history of English literature, supplemented by a study of English poets, completes the four vears' course.

#### RHETORIC.

One period a week is assigned to each of the three upper classes for the study of rhetoric.

#### COMPOSITION.

Four compositions are required each week from the three upper classes. The work is correlated with the course in literature—narration, description, exposition and argument, each taken in turn. The course is designed to awaken the interest of the pupils in theme-writing and to enable them to express their thoughts clearly and logically.

The pupils are urged to write from their own experience, to write often, to eliminate by degrees all faulty expressions and to acquire the habit of using simple, correct, idiomatic English words.

#### DEPARTMENT OF PHYSICAL TRAINING.

#### Physical Training I.

Individual prescription work.

Class work. Military marching; free, ring and horizontal bar exercises.

Games.

#### Physiology I.

Relation of health to posture, cleanliness and dress. Study of the skeleton and of the muscular system. Emergencies.

#### Physical Training II.

Individual prescription work.

Class work. Marching, fancy steps; free, dumb-bell, club and wand exercises.

Games.

#### Physiology II.

Anatomy, physiology and hygiene of the respiratory and digestive systems.

Practical demonstrations and experiments.

Emergencies.

#### Physical Training III.

Individual prescription work.

Class work. Marching; free, chest-weight, horizontal bar, ring and club exercises.

Fencing.

Games.

#### Physiology III.

Anatomy, physiology and hygiene of the circulatory and nervous systems.

Study of the special senses.

Physical Training IV.

Individual prescription work.

Class work. Marching, jig and fancy steps; free, bounding ball, dumb-bell, chest-weight, club, wand and ring exercises.

Games.

Physiology IV.

Physiology of the nervous system.

Papers on diet, exercise, sleep, bathing and clothing.

Talks on first aid to the injured, together with practical demonstrations.

#### DEPARTMENT OF MATHEMATICS.

- I. Original work in inspectional geometry and elementary algebra.
- 2. Elementary algebra completed.
- 3. Plane geometry,—demonstrations and original work.
- 4. Solid geometry or advanced work in algebra.

#### DEPARTMENT OF MUSIC.

The aim of the department of music is to cultivate a taste for good music and to prepare the girls for intelligent and appreciative work in the further pursuit of the art in its various branches.

The vocal and choral study includes vocalization, solfeggio, sight reading, dynamics, breath control, intonation, enunciation, unison and part singing.

The elementary theoretical work (required) aims to give the pupil a thorough foundation in the elements of music and includes rhythm, meter intervals, the derivation and construction of our present day tonalities, major, all minor forms and chromatic scale in all keys, triads, chords of the dominant and diminished sevenths and cadences, leading to the study of

Harmony—elective, but strongly advised for all pupils in vocal or instrumental study.

Individual class work, one period weekly.

Vocal and choral work (entire school required) one period weekly.

#### DEPARTMENT OF HISTORY.

 A preliminary consideration of the origin and races of mankind,—their primitive condition, migrations and progress toward civilization.

A brief study of the extinct civilization of the East. Greek history to the death of Alexander.

- 2. Roman history from the founding of the city to the fall of the empire.
- 3. English history from the Roman invasion to the accession of Edward VII.
- 4. American history, special attention being given to the forces which have shaped the government of the United States and developed its present institutions. Civil government of the United States.

#### DEPARTMENT OF SCIENCE.

 Introduction to science,—training in careful observation and scientific methods as a preparation for subsequent work.

The evolution of the solar system and the formation of the earth.

The elementary facts of astronomy and geology.

The examination of a few of the common minerals and rocks.

The systematic observation and record of some common phenomena.

Simple experiments to ascertain facts or to test given propositions.

The classifications of facts under divisions of science.

2. Zoology, first half year.

The time is about evenly divided between laboratory and recitation work.

Flementary work in morphology, physiology and some ecology.

Botany, second half year.

There is considerable field work for the purpose of identifying plants, studying their habitat and procuring specimens for a small herbarium.

3. Chemistry or Physics.

A class in one subject only will be formed for those electing science in the third year.

4. Physics or Chemistry.

The subject not taken in the third year is offered in the fourth.

#### DEPARTMENT OF LATIN AND GREEK.

#### LATIN.

I. Latin Lessons.

Translation of prose selections.

2. Caesar,—Commentaries on Gallic War, books I-IV inclusive.

Sight reading.

Prose composition.

Grammar.

3. Cicero,—Orations against Catiline, The Manilian Law, and Archias.

Sight reading.

Prose composition.

 Virgil,—Æneid, books I-VI inclusive. Sight reading. Prosody.

#### GREEK.

- Greek Lessons.
   Translation of easy Greek narrative.
- Zenophon,—Anabasis, books I-IV inclusive. Sight reading. Prose composition.
- Homer,—Iliad, books I-III inclusive.
   Sight reading.
   Prose composition based upon Attic Greek.

#### DEPARTMENT OF MODERN LANGUAGES.

#### FRENCH.

I. Pronunciation.

Grammar: Declension.

Conjugation of regular verbs and of a few irregular verbs.

Simpler uses of tenses and moods.

Syntax.

Memorizing: Vocabulary for oral and written work.

Prose and poetry selections.

Composition: Translation into French.

Transposition. Reproduction.

Dictation.

Easy conversation.

Reading of simple French.

2. Grammar: Rapid review of grammar.

Conjugation of irregular verbs.

Uses of tenses and moods.

Memorizing: Vocabulary enlarged.

Idioms.

Prose and poetry selections.

Composition: Translation into French.

Transposition.

Paraphrasing.

Dictation.

Easy conversation.

Reading: Contes de Fees, Merimee's Colomba. Sandeau's Le Gendre de M. Poirier.

3. Grammar: Review and continuation of difficult points.

Syntax.

Memorizing.

Composition: Translation into French.

Transposition, Paraphrasing.

Abstracts.

Dictation.

Conversation.

Reading: Selections from Zola, Maupassant, Balzac, Hugo, Daudet, Loti.

Corneille's Le Cid, Racine's Athalie, Moliere's L'Avare.

#### GERMAN.

1. Pronunciation.

Grammar: Declension.

Conjugation of weak verbs and of the more usual strong verbs.

Simpler uses of tenses and moods.

Prepositions.

Syntax.

Memorizing: Vocabulary for oral and written work.

Prose and poetry selections.

Composition: Translation into German.

Transposition. Reproduction.

Dictation.

Easy conversation.

Reading and translation of Fairy Tales.

2. Grammar: Conjugation of strong and irregular verbs and modal auxiliaries.

Order of words.

Translation: Schiller's Der Neffe als Onkel.

Benedix' Eigensinn.

Gerstacker's Germelshausen.

Lyrics and Folksongs.

Sight reading from easy texts.

3. Prose Composition.

Exercises in idiomatic German, including letter writing, short dialogues and descriptive themes.

Conversation.

Translation: Lessings' Minna von Barnhelm.

Schiller's Jungfrau von Orleans.

#### DEPARTMENT OF BUSINESS.

Commercial Arithmetic I. Subjects: Common and decimal fractions, common measures, interest, percentage, discount, insurance, taxes, duties, exchange, partnership.

- After a review of fundamental processes pupils are drilled in business methods.
- Bookkeeping I. The principles of double and single entry bookkeeping are presented in a clear and practical manner. Neatness and accuracy are insisted upon.
- Bookkeeping II. The work of the previous year is continued, giving, as far as possible in a school, business practice.
- Stenography I. The principles of stenography are learned, and practice in reading and writing shorthand is begun.
- Stenography II. Regular and systematic practice in reading and writing shorthand is continued in order to secure accuracy and speed.
- Typewriting I. After the use of the typewriter has been learned, practice is given in writing from shorthand notes and from dictation.
- Typewriting II. The practice of the preceding year is continued and the pupils are taught to use at least one standard duplicator.

#### DEPARTMENT OF ART.

The study of art must necessarily be considered as a whole rather than the work of different classes; therefore, the course of drawing is arranged to meet the needs of the individual student and is varied to suit any requirements.

Pupils are not only fitted for continuing their studies in advanced schools, but also to appreciate the best in art.

The general plan is as follows:

Free-hand drawing of objects in pencil, and pen and ink, and principles of perspective.

Study of form, light and shade.
Study of design, applied decoration.
Study of color in water colors and in oil.
Modeling and casting.
Mechanical drawing.

# DEPARTMENT OF HOUSEHOLD SCIENCE AND ARTS.

The first year includes:

- 1. A simple outline of the location and surroundings of a home and the proper conditions existing in that home. Special attention is given to the dining room and kitchen, together with the care and use of their furnishings and utensils.
- 2. Study of air, fire, water and some of the most important elements in relation to life, heat, cooking.
- 3. Study of food, its functions; growth, waste and repair of the human body.
- 4. Food principles; water, proteid, mineral matter. Under these subjects foods are prepared and cooked by the pupils. The composition, food value, growth, market value and best method of serving are discussed.
- 5. Visits to the markets to see the cutting up of beef, lamb and veal, that the pupils may be able to buy economically and understandingly the different cuts of meat.

The second year course will be a continuation and enlargement of the first year course, with lessons on invalid cooking and serving, table service and table etiquette, the preparation of inexpensive but nourishing meals and the serving of the same, instruction in drawing plans of a kitchen and dining room, and in furnishing them conveniently, economically and tastefully.

#### Class Ode

#### WRITTEN BY MARGUERITE DAVIS

The gates of Life's arena swing apart,
Three blasts of brazen trumpets shrilly sound,
And thrice the heavy hammer strikes the mark
To summon us to loss or world renown.

Whate'er the proof, whate'er the foe we meet, Or be it Man or Beast or Wooden Cross, Let's on with courage high and strong heart-beat To win the vict'ry, scorn the thought of loss.

When laurel-crowned Vict'ry's palm is raised
And thunder echoes thunder of applause,
Heed not the World's vain-glorious, flattering-praise;
True judgment follows th' ensuing breathless pause,

While tier on tier with one accord arise

To catch His words, the Judge of every strife:
"To thee is due, this day, the victor's prize,
The guerdon that shall ever crown thy life."

#### Calendar for 1907

Winter term: Wednesday, January 2—Friday, March 22.

Founder's Day: Tuesday, March 12.

Spring Term: Monday, April 1—Friday, June 21.

Graduation: Wednesday, June 19.

Entrance examination: Friday, June 21, and Tuesday, September 10, at nine o'clock A. M.

Fall term: Tuesday, September 10—Wednesday, December 18.

New Year: Monday, January 6, 1908.

Holidays: February 22, April 19, May 30, June 17, and the remainder of the week from Wednesday noon next preceding Thanksgiving

## Report of the School Committee

To the Citizens of Quincy:

The schools of the city are in good condition, are in charge of good teachers and commendable progress is being made in all departments.

The work of the High School is not what it would be, if it were housed in one building where the full spirit of the school would be developed. Notwithstanding the objectionable conditions that prevail, it is fair to say that good progress is being made. It is believed that at the beginning of the winter term a part of the new building will be in such shape that it may be occupied, and that at no distant day the entire building will be finished. In the opinion of your committee, the city will then have a thoroughly equipped building in which all citizens may take just pride. How long this will be large enough to meet the needs of the school it is impossible to say. The city is growing so rapidly that any prediction in this direction is unwise. When the time does come for another high school building it will have to be built in a new location.

In the Lincoln and Coddington districts there is a pressing demand for greater school accommodations. At the Lincoln, enlarged quarters are needed; at the Coddington, the demand is for a modern school building of at least fourteen rooms. The present building is in much the same condition as when originally built more than fifty years ago, except that it has been enlarged by the addition of a story. Land has been purchased which materially increases the school lot. The school house at Atlantic, already contracted

for, will be ready for occupancy in 1907 and will relieve the long standing overcrowding in that district.

There seems to be on the part of those who are responsible for the present situation, an unwillingness to recognize the necessity for greatly increased school accommodations. vet this growth of our school population has been so constant for several years that the need is quite clear and, indeed, can be very accurately forecast. There are over six hundred new pupils entering the schools each vear. There are less than five hundred going out, therefore, there are from one hundred and twenty-five to one hundred and fifty additional scholars to be provided for annually; hence, it is clear that an eight room building is required every two or three years to meet the demand. The increase in accommodations has not kept pace with the increase in pupils. The schools are crowded far beyond their proper limits and the classes are much too large for one teacher. It does seem to your committee that wise forethought should have prevented this condition. Civic pride, to say nothing of sanitary law, should lead us to avoid further just criticism of the overcrowding of our schools.

It is impossible to supply the schools and to teach six thousand children for a smaller sum than is annually requested by the School Committee. The cheese-paring economy which has prevailed for the last few years has injured our schools in certain important details. The city, as all know, is required to support public schools, and this is a wise requirement. In the opinion of your committee, the first duty devolving upon the city government is to provide for the schools in a wise and conservative, yet ample manner, giving to the people the best possible return for the money expended and one that will be of lasting value to the community.

It will be remembered that the charter of our city cre-

ates a governing power of three heads, namely, the executive, the legislative, and the school department, each supreme in its particular work.

Among the duties prescribed by the charter is one which requires that no school building shall be erected until the plans for the same have been approved by the School Committee. This cannot be mentioned too often as it has been said in some quarters that delays in building school-houses have been due to the exercise of this right so distinctly given to the Committee. It is a cardinal point of our charter that no department shall encroach upon the rights and duties of the others; and it is clear that in exercising its rights the School Committee has followed the charter most closely.

The City Council approved the increase in the salaries of \*teachers and janitors, recommended by the Committee, and appropriated the amount necessary for the current year. The increase was none too large. The city has received its equivalent in faithful service and in good results.

The Superintendent of Schools in our city has performed his duties in a manner most acceptable to your Committee. His earnestness and ability are fully appreciated by us and the schools show by their good work his careful supervision and the high ideals which have actuated him ever since he has been at the head of our schools.

The details of the school management, such as attendance, finances and other matters, will be found in the Super-intendent's report which is published herewith and to which your attention is called.

To the Board of Directors of the Woodward Institute the sincere thanks of the School Committee and the community are due for its kindness in allowing the pupils of the High School the use of the institute building during the last term. It would, indeed, have been a serious problem for the Committee had not these rooms been placed at its disposal.

The legislature of Massachusetts at its last session established medical inspection of the public schools of the state. The physicians to perform this duty were to be appointed either by the Board of Health or the School Committee. In our city, the Board of Health decided to make the appointments and there has been regular inspection since the middle of October. It is believed that the inspection will be of great value; at present writing, however, it is too early to make positive report upon the work.

Hoping that the schools of our city will ever appeal to the people as the one thing of first importance and that generous support will always be guaranteed to them, your Committee submits its annual report, desiring and believing that our children will be given such instruction as will make them better citizens and bring greater credit to our good old community.

The above report was presented by a special committee consisting of Hon. Charles H. Porter, Dr. Wellington Record and Mr. Frederick H. Smith and was adopted as the annual report of the School Committee Saturday evening, December 22, 1906.

FRANK E. PARLIN, Secretary.

# Report of the Superintendent

To the School Committee of Quincy:

Herewith I submit my seventh annual report which is the thirty-second in the series of annual reports by the superintendent of public schools and the fifty-seventh of the printed reports of the School Board of Quincy.

### MEDICAL INSPECTION.

By far the most important educational bill passed in recent years is "An Act Relative to the Appointment of School Physicians," passed at the last session of the General Court, the first five sections of which read as follows:

Section I. The school committee of every city and town in the Commonwealth shall appoint one or more school physicians, shall assign one to each public school within its city or town, and shall provide them with all proper facilities for the performance of their duties as prescribed in this act: provided however, that in the cities wherein the board of health is already maintaining or shall hereafter maintain substantially such medical inspection as this act requires, the board of health shall appoint and assign the school physician.

Sec. 2. Every school physician shall make a prompt examination and diagnosis of all children referred to him as hereinafter provided, and such further examination of teachers, janitors and school buildings as in his opinion the protection of the health of the pupils may require.

Sec. 3. The school committee shall cause to be referred to a school physician for examination and diagnosis

every child returning to school without a certificate from the board of health after absence on account of illness or from unknown cause; and every child in the schools under its jurisdiction who shows signs of being in ill health or of suffering from infectious or contagious disease, unless he is at once excluded from school by the teacher; except that in the case of schools in remote and isolated situations the school committee may make such other arrangements as may best carry out the purposes of this act.

Sec. 4. The school committee shall cause notice of the disease or defects, if any, from which any child is found to be suffering to be sent to his parent or guardian. Whenever a child shows symptoms of smallpox, scarlet fever, measles, chicken pox, tuberculosis, diphtheria or influenza, tonsilitis, whooping cough, mumps, scabies or trachoma, he shall be sent home immediately, or as soon as safe and proper conveyance can be found, and the board of health shall at once be notified.

Sec. 5. The school committee of every city and town shall cause every child in the public schools to be separately and carefully tested and examined at least once in every school year to ascertain whether he is suffering from defective sight or hearing or from any other disability or defect tending to prevent his receiving the full benefit of his school work, or requiring a modification of the school work in order to prevent injury to the child or to secure the best educational results. The tests of sight and hearing shall be made by teachers. The committee shall cause notice of any defect or disability requiring treatment to be sent to the parent or guardian of the child, and shall require a physical record of each child to be kept in such form as the State Board of Education shall prescribe.

Under this act the local Board of Health early in October divided the schools of the city into five districts and

appointed a school physician to each, These physicians have regularly visited the schools twice a week. They have examined all pupils showing any abnormal physical conditions and have sent those presenting signs of ill health home to be treated or advised by their family physician. Even if a few have been needlessly sent home, the inspection has already proved its great value not only to individuals, but to the community. To name a single case, a child after a brief illness, returned to school, was examined by the inspector and found to have traces of scarlet fever. This child and the other children from the same family were sent home at once. A few days later one of the children excluded from school developed a clearly marked case of scarlet fever. Had there been no medical inspection, the first child would probably have been allowed to join his class and thus have spread the disease which could easily have become epidemic in that part of the city at least. Had it become so, the aggregate cost of medical attendance in the families afflicted would have been much greater than the annual cost of medical inspection of the schools, to say nothing of the probable loss or permanent injury of some of the children. This case illustrates the chief work of the inspector, which is to detect disease in its incipient stage, isolate it and thus prevent it from spreading. It not only protects the children and prevents much absence due to fear of contagion, but it relieves parents of much anxiety. Moreover, the inspector often calls the parent's attention to a morbid condition of his child which would entirely escape his own unpracticed eye, and so secures for the child early and necessary treatment. The whole tendency of medical inspection of the public schools is to diminish, not to increase the work of physicians in our city, and careful thought upon the subject should lead parents unanimously to approve and to support it. When their child is sent home by the inspector it is folly for parents to be indignant. They

should be thankful and see that the child promptly receives the treatment he needs. If parents will heartily co-operate with the school physicians, medical inspection will speedily justify itself in the minds of all.

Under section five of the above law the teachers in the public schools are required to test annually the sight and hearing of their pupils. In conformity with this requirement the tests were made in all the elementary schools during the last term. They were not made in the High School because it was found impracticable under the existing conditions in that school. The enrolment in the elementary schools at the time the tests were made was 5,125, the number of pupils found defective in evesight was 586 and the number found defective in hearing was 151. Notices were sent to 556 parents or guardians, it not being necessary to notify those parents who were already aware of the defects of their children and had called in the services of a specialist. It was found impossible to apply the required tests satisfactorily to most of the pupils in the first grade. The results of the examination, however, show that nearly twelve per cent, of the pupils suffer from defective sight and three per cent, from defective hearing. Of course the eye test reveals only the most prominent defects, no attempt being made to discover cases of astigmatism, color blindness and other defects which the examination of a specialist might reveal.

It is not necessary for us to argue at length the importance of the sight and hearing tests in this report as we did so in our report of 1904 when our first tests were made. Some parents seem not to appreciate the importance of correcting, as far as possible, the visual defects of their children and the children suffer from the neglect, suffer not only physical discomfort and injury, but suffer educational loss, which means loss in the opportunities of life. Other parents make the mistake of taking their children to vendors of spec-

tacles to be fitted with glasses instead of to an oculiest to find what is the trouble. The result is some children are wearing glasses which are absolutely useless, if not positively harmful to them. A matter which often means so much to the children should certainly receive the prompt and careful attention of parents. This fact cannot be urged too strongly.

# GRADED SELECTIONS FOR MEMORIZING.

In many places the teaching in the public schools has gone from the abuse to the neglect of the memory, from measuring the results of school work largely by the ability of the pupil to repeat the words of the text book to avoiding nearly all the direct training of the exact memory. Both extremes are bad and unnecessary. The observation. thought and language of the child may be successfully cultivated without depriving him of the convenience and accuracy of helpful rules or important data, and certainly without robbing him of the guidance, enjoyment and inspiration assured to the mind well stocked with choice quotations from our best literature. Not to store the memory with the purest expressions of patriotic sentiment, with the maxims of the sages, with the visions of the poets and the aspirations of saintly souls, is to neglect a very important part of the education of youth. When one has adorned the halls of memory with these truths and these beauties of form and imagery, he not only has safe standards of taste and conduct under all conditions of life but he has the constant companionship of the noblest thought of the ages and an adequate expression of the best in himself. His reading and meditation, his feelings and ideals, his motives and actions, are likely to be on a higher plane than they otherwise would be. He cannot easily escape their silent teachings even if he would. They give comfort and good counsel when one most needs them. They are true friends who reprove his folly and shame his selfishness but never desert or betray him.

Much depends upon how such selections are taught. Merely to have the words committed to memory, although valuable, is a small part of what should be accomplished. In the first place, the teacher should carefully study the selection, memorize it and think of it until she knows it, sees it, feels it, lives it and then she is prepared to present it to her class with all the clearness and expression at her command, and to lead her pupils, as far as possible, to catch its meaning, its beauty, its spirit and inspiration. By thus making it significant and enjoyable from the first, the child's imagination draws the pictures more vividly, his feelings respond more strongly and his memory makes the record more quickly. The impression is deeper and more lasting, and the sentiment is more likely to become a potent force in his intellectual and moral life. Above all things, she should avoid literary anatomy and preaching. Just let the piece itself speak to the mind and heart of each child according to his capacity to receive it. If it is worth learning, no child can comprehend its full meaning and heauty at once. See that it is properly transplanted in his memory and leave it there to grow and bear fruit through all his future years. If after thoughtful study the teacher does not believe or enjoy a selection, if she cannot put heart and enthusiasm into it, she should not attempt to teach it to any one, much less to children.

The selections should not all be of one type either of form or of sentiment. They should appeal to different moods, present many phases of thought and touch various chords of feeling, always, however, calling the mind and the heart to wholesome exercise.

While the study in each case should begin with the selection itself and so much of its setting as is necessary to clear understanding, it may very profitably close with a brief sketch of the writer.

Although many of the selections are short, it is not expected that every pupil will learn all those assigned to his grade. Some children memorize so much more readily than others it should be required of each according to his ability. While the list suggests an abundance of suitable material for the several grades, it is highly desirable to have it supplemented by some well-chosen proverbs or maxims presenting the condensed wisdom of the race. Each Monday morning a maxim may be placed upon the blackboard in front of the pupils as their special thought for that week. It may well be used as the text for penmanship practice in the upper grades. Generally, every pupil will know the proverb long before the end of the week. Occasionally there should be a maxim match to see who can recall the largest number of them.

Note.—The figures 1, 2 and 3 used below indicate the books in which the selections may be found.

### EVENING SCHOOLS.

Evening common schools were opened in the Adams and Willard buildings and an evening drawing school in the Old High school on Monday evening, October 8, and, after forty sessions, closed Tuesday evening, December 18, 1906. These schools were in session four evenings—Monday, Tuesday, Thursday and Friday of each week.

The Adams school was in charge of Archer M. Nickerson, principal, assisted by Elizabeth S. Hiscock, Samuel D. Thompson, Elizabeth A. Garrity, Josephine Kelley, Jennie F. Griffin and Minnie E. Donovan. The number of sessions was forty. The total enrolment was 258, of whom 229 were men and 29 women. The average attendance was 85.18 and the average number of teachers 6.43.

The Willard school was in charge of Austin W. Greene, principal, assisted by William R. Kramer, Frances C. Sullivan, Catherine McGovern, Mary B. Keating and Ellen G. Haley. The number of sessions was forty. The total enrolment was 129, of whom 112 were men and 17 women. The average attendance was 36.20 and the average number of teachers 4.03.

An effort was made at the opening of the evening schools to eliminate those persons who came with no serious

purpose of studying. This accounts for the diminished enrolment. But while 87 less persons were enrolled in these schools than last year, the average attendance was only 13 less, thus showing a decided gain in the percentage of attendance, notwithstanding one or two very stormy nights when it was hardly suitable for anyone to be out.

In most of the classes excellent work was done and more than usual was accomplished. But the time has come for revising the course of study and changing the classification so as to make smaller and more homogeneous groups. Not over fifteen pupils should be assigned to a teacher, and the principal should be given more time for the work of classification and supervision. It also seems highly desirable that lectures upon subjects specially adapted to the needs of members of these-schools should be given occasionally. At least there should be some appropriate closing exercises each year, including the presentation of certificates to those who have satisfactorily completed a two years' course of study. These would not only add variety but would tend to improve the attendance and to impress upon the members the importance of their work.

The first business of the evening common schools is to teach illiterates and non-English speaking foreigners to read and write the English language. The emphasis should be placed here and then the members should be given as much of an elementary education as the time and attendance will permit.

Heretofore in the classes learning to read the primers and first readers of the day schools have been used. In fact, most of the books used in the evening schools have been old discarded books of the day schools. This has been a mistake. In the first place, the thought presented in the ordinary primer is childish and of no interest to an adult. It is quite as important that the reading books be adapted in thought

as in language to the learner. Such books have been prepared and are to be had. Again, old dilapidated books always greatly detract from the interest of any class. There is something attractive and pride inspiring about a good clean book. These influences are as potent in the evening schools as elsewhere.

The evening drawing school was in charge of Frederic G. Elton, who by training and experience is unusually well qualified for this work. The number of sessions was forty and the total enrolment was 45, of whom 31 were in the mechanical class and 14 in the free-hand class. The average attendance was 22—14.8 in the mechanical class and 7.2 in the free-hand.

### RESIGNATION OF TEACHERS.

During the year twenty-one teachers, including one master, have resigned, twelve of them to accept more lucrative positions elsewhere. Most of these resigned before the increase in salaries took effect in September. Several others were offered positions, but on account of the increase decided to remain here. Among these were some of our best teachers.

In August Charles H. Taylor, Master of the Willard school, tended his resignation to accept the Principalship of the Devotion school in Brookline. Mr. Taylor came to this city from Portsmouth, N. H., in September, 1903, to take charge of the Wollaston-Massachusetts Fields district, the Master of that district having been granted a leave of absence for a year. On the return of the old master, Mr. Taylor was transferred to the Willard school, where he remained two years. During his term of service here he fully maintained the excellent reputation which he had established at Portsmouth and elsewhere. He demonstrated his ability as a most efficient organizer and administrator of a large and difficult school. He proved himself a wise and tactful disci-

plinarian, an accurate and forceful teacher and an unusually popular and successful manager of boys. He took a genuine interest in them and inspired them with a loyal and manly spirit. Mr. Taylor enjoyed the confidence and esteem of all who were associated with him in school work and left behind him an enviable reputation as a schoolmaster.

### THE HIGH SCHOOL.

The most perplexing problem of the year was how to provide in September for seven hundred high school pupils with no place in which to house them, except an old fourroom building condemned a dozen years ago as unfit for school use. This situation was an exceedingly unfortunate climax to the very unfavorable conditions under which the High School had been doing its work for several years. Had not a commendable public spirit led the Directors of Woodward Institute to open the institute building to high school classes afternoons during the fall term, the solution of our problem would have been still more difficult; and had a less efficient head master been in charge, the school would have suffered much more seriously, even if it had not become utterly demoralized. That there should be a great loss of interest and in the amount of work done was inevitable. But the gravest consequences lay in the irregular habits formed, in the blighting of educational ambition and in turning the current of some lives into new and less promising channels. On the other hand, many of the pupils did good work, much better than could have been expected under the conditions; the teachers cheerfully and uncomplainingly did the best they could and the parents were remarkably patient during the long continued delay and confusion. Why the new building was not ready in September as promised is for others to explain; we can only state the fact that on December 31, or nearly four months after a part of it was supposed to be ready for school use, not a single room was ready for occupancy. All look forward to the opening of the next term with great hope for the beginning of an era of comfort and prosperity for the Quincy High School.

For the details of the work of the High School the reader is referred to the appended report of the Head Master.

Respectfully submitted,

FRANK E. PARLIN.

December 31, 1906.

# QUINCY HIGH SCHOOL

Mr. Frank E. Parlin, Superintendent of Schools:

In accordance with custom, it gives me pleasure to submit the following report of the Quincy High School for the year ending December 31, 1906.

Conditions have been far too difficult for the school to make any progress other than along lines which were established in former years. Teachers and pupils have worked hard to maintain the usual high grade of scholarship, deportment and attendance; but all have labored under the greatest disadvantages and have found it impossible to accomplish their purpose.

In January, 1906, it looked as if the end of the summer vacation would find the school free from the overcrowding which it had endured so long. Plans had been accepted, money appropriated and foundations laid; but the future hid the greater difficulties which were to be faced in September.

During the winter and spring terms, the school was divided into three sections, a morning and an afternoon session at the main building, and a morning session at the old building in the southern part of the city. This plan was similar to the one used in the two preceding years and gave fairly satisfactory results. Remodeling of the building was started immediately after the graduation, but it was not ready for occupancy at the end of the summer vacation. This left no accommodations for a school of over seven hundred pupils, except the old building of three rooms. At this crisis, permission was secured from the Directors for the use of Woodward Institute afternoons from quarter before two to six o'clock. The pupils were divided into four sections, and handled in four sessions, two forenoon sessions at

the old building and two afternoon sessions at the Woodward. The afternoon sessions were less than two hours long. Nothing but class recitations were held, all study periods and general exercises being omitted. Even then it was necessary to hold from two to four recitations at the same time in some rooms and to omit all drawing, music, laboratory and reference work. That the progress of the pupils under such conditions could not be satisfactory is apparent; that many pupils, especially of the upper classes, lost opportunities for a broad education cannot be denied; and that the city did not make the most of its opportunity to train its youth for the widest social service is certain.

The shrinkage in registration during the summer vacation was nearly two per cent. greater than in former years; and the number who left during the fall term was about five per cent. larger, mostly from the upper classes. Again, the percentage of daily attendance during the fall term was 93.4 per cent., which is almost two per cent. lower than formerly and means that there were about fourteen more pupils absent each day. It is not difficult to find the reasons for the loss of pupils and the decrease in membership and attendance. Pupils and parents saw little chance to secure an education under such crowded conditions, in such short sessions and at such unfavorable hours. Pupils worked or played all the forenoon, and were too tired to attend school in the afternoon. Some parents thought that the education which could be obtained in less than two hours did not repay the boys and girls for the loss of opportunities for profitable work, while others objected because their boys and girls must do school work in rooms poorly lighted by artificial means, and because they must return home after dark.

It is to be regretted that conditions have made it necessary to omit subjects as important as music and drawing. There has been neither room nor time since September for

either of these. The new building, however, with its assembly hall and drawing room, will provide an excellent opportunity to resume and to broaden the courses in each of these subjects. Drawing, especially, should be allowed the same number of recitations per week as the sciences, languages and mathematics, and should be broadened by the introduction of more advanced courses. A pupil who likes drawing and shows aptitude for it should be allowed to make it one of his four required courses.

The wear and tear on school property has been very much greater than usual. All the furniture, supplies, apparatus and books had to be moved first to the old building, where they were stored during the summer; then, when school opened, to the storage rooms on Washington Street; and finally, back to the main building midst dust and dirt. All through the fall term the pupils have been deprived of desks where they could keep their books and supplies, and have been obliged to carry them back and forth to school each day in straps or bags. Even with the greatest care on the part of all concerned, there have been many scratches, much breakage and considerable loss.

The old furniture still needs a careful and thorough overhauling before it is placed or used in the new building. The marks and scratches on the desks act as a constant suggestion to the pupils to make more marks. Covering the desks with a coat of varnish is not sufficient. They ought to be scraped or planed and then varnished. In some cases new tops ought to be provided.

Ten lessons in cooking for the girls of the senior class are too small a number to give much practical knowledge of the subject. Domestic science should be a regular course for the girls of the upper classes. The new building provides a room for this department. Some provisions should be made for the equipment of the room and for a teacher who

can not only conduct classes, but can also manage the lunch room which is connected with it. The health of the pupils would be improved if there were an opportunity for those who need it, to purchase a simple but good lunch.

Is it not time that provision were made for the introduction of some form of manual training into the courses of study? Young men and women are graduating each year without any special training to fit them for doing skilful work in the numerous industries of the city. Quincy's prosperity today is due largely to the stonecutters who are working her natural resources, and to the machinists who are taking advantage of her fortunate location. The continuation of this prosperity, as competition increases, will depend much upon the skill of hand and the activity of mind which the rising generation shall possess. No wiser expenditure of money can be made than in providing liberal opportunities, in the form of workshops, for the training of the hand and eye as well as of the mind.

It now looks as if part of the building will be ready for use soon after the opening of the new year; but it is doubtful if the whole building will be finished and ready for occupancy much before the beginning of the school year, next September. When completed it gives promise of providing the youth of the city for several years with ample accommodations and excellent opportunities for a high school education.

Before leaving school, the members of the class of 1906 raised a large amount of money for school decoration by publishing the annual number of the Golden Rod, and they also donated a generous sum from the class treasury for the same purpose. The following data show that the city acted wisely in providing this class with the means of an education:

The class is distributed as follows:

Graduate work in High School	4
College	6
Other Schools	16
Teaching	1
At work in Boston	
At work in Quincy	17
At home	5
Total	72

In closing, I wish to thank the members of the Committee, the Superintendent, and my assistants for their hearty support and co-operation.

Respectfully submitted,

CHARLES F. HARPER.

- April 18, 1906. Dinner at State of Maine Club. "The Ideal Schoolmaster." Members of the Club.
- October 17, 1906. Each Grammar Master was assigned some subject of the Grammar School course and was given five minutes to tell "What to Do and How to Do It."
- November 19, 1906. "Labrador." Col. Edward Anderson.
- December 19, 1906. Dinner at State of Maine Club. "Waste in Education." Supt. Asher J. Jacoby, Milton.

# REPORT OF TRUANT OFFICER

To Mr. Frank E. Parlin, Superintendent of Schools:

I herewith submit my ninth annual report as Truant Officer. The work of the past year has been largely given to the investigation of cases of reported absence from school, of which the accompanying table will show that there was an increase of two hundred forty-nine over the preceding year. This is due in most part to the neglect of parents, and their eager haste to get their children to work; and also to the wretched condition of the high school, which caused many children to absent themselves from school and to deceive their parents about the matter.

With the rapid growth of the city, only the stern hand of the school laws and a vigorous enforcement of the same by this department will keep the unruly, discontented children in school, and I might say bring the lawless, selfish parents to a realization that there is a law protecting and insisting on the education of the children.

With the change in the law a considerable portion of my time has been given to the enforcement of the law requiring labor certificates. I have found in nearly every case a ready response and desire on the part of the employers to comply with the same.

I feel sure much that has been accomplished in this department is due to the careful attention to all the details of the department by the superintendent, and certain work carried out by me under his direction.

I wish at this time to record my sincere thanks for every courtesy extended to me during the year by all connected with the school department.

The following tables will show in detail my work for the year.

# TRUANT STATISTICS.

<sup>\*</sup> In three cases two schools are in charge of one master. The Adams and Cranch, the John Hancock and Lincoln, the Massachusetts Fields and Wollaston.

Twenty-one teachers resigned during the year.

Fifteen teachers are graduates from college.

Eleven attended college, but did not graduate.

Fifty-seven are graduates from normal schools.

Three attended normal school but did not graduate.

Six are graduated from kindergarten training schools.

The average salary of all teachers in the first eight grades (not including masters) was \$519.75.

The average salary of all teachers in the High School (not including Head Master) was \$810.31.

<sup>†</sup> This number includes the teacher of cooking, although but twenty lessons are given during the year.

- (a) College graduate.
- (b) Attended college but did not graduate.
- (c) Graduate of normal school.
- (d) Attended but not a graduate of normal school.
- (e) Graduate of kindergarten training school.

### RESIGNATION OF TEACHERS.

The following named teachers resigned to accept positions as indicated:

High School:

February: Harrison A. Morse,

April: Arthur F. Campbell,

June: Lee T. Gray,

Business

Boston

Palmer

September: Clarence I. Lewis, Colorado University

Adams School:

March: Harriet T. Ross, Married

Coddington School:

April: Grace E. Patterson, Married
June: Alice F. Sampson, Married
June: Elizabeth B. Beaudry, Newton
December: Annie P. Hall, Married

John Hancock School:

February: Mary A. Thomas, Newton September: Ethel Cuttle, Fall River

Massachusetts Fields School:

June: Virginia F. Rowell, Study
June: S. Jean Smith, ——

Quincy School:

January: Evelyn G. McGinley, Boston
February: Georgia P. Wardwell, Somerville
June: Katherine A. Pike, Somerville
June: E. Marion Demick, Married

Willard School:

February: Linna M. Ferrer. Newton April: Ina M. Harden, Newton

August: Charles H. Taylor, Master, Brookline

Wollaston School:

April: Ida J. Cameron, Married
